Slip Angle 27-35°
Suited to outdoor
applications

High Friction
Low slip risk
Slip Angle 35°+

Tidbit

The higher the R-rating the rougher the tile's surface. However, a rough surface holds dirt and marks from shoes and hereby increases the maintenance requirements

SURFACE FINISH

SURFACE ABRASION RESISTANCE

Wall Tiles only.
Not for use on
floors.

Floor covering
for use on very
light-wear
domestic
areas e.g.
Kitchen &
Bathrooms

Floor covering
for light-traffic
areas in a
domestic envi-
ronment only.
e.g Kitchen &
Lounge areas

Floor covering
for light to
moderate
traffic areas.
These tiles
should only
be used do-
mestically but
can be intalled
in all areas
including
entrances and
passage ways.

Floor covering
for moderate
to heavy traffic
areas, suit-
able for light
commercial
applications
e.g. offices,
bars and
restaurants.

Floor covering
for heavy to
extra heavy
traffic areas,
e.g. airports &
malls

STAIN RESISTANCE

Stain is not
removed

The stain is
removed using
solvent, such
as acetone

The stain is
removed using
a strong com-
mercial clean-
ing agent

The stain is
removed using
a weak com-
mercial clean-
ing agent

The stain is
removed using
hot water

From Humble Beginnings – For The Love Of Tiles

Giacomo Ghisleni [1881-1947]

Our Founder and Specialist in Terrazzo Tile Manufacturing

Pretoria Factory [1910]

The Foundation | 1922

In 1922 Union Tiles was established in Jeppe South, Johannesburg as a Terrazzo tile and concrete products manufacturer. It continued to operate at this location until 1950

Jeppe South Africa [1950]

The Next Step | 1950

In 1950 the company moved to Wychwood (JHB), where it was a tile manufacturing company for the next 18 years.

Coming Home | 1968

Finally, Union Tiles moved to Bedfordview in 1968. The head office is still situated here, and now boasts one of the largest tile showrooms in South Africa.

Today | 2022

Today, the Union Tiles Group is the largest independent tile distributor in South Africa, handling the widest range of floor and wall tiles in the country, in either Ceramic, Porcelain, Natural Stone or Terrazzo Finishes, with branches in all the major metropolitan regions as well as in Namibia.

Union Tiles attaches great importance to searching for the latest trends and developments in the tile, wall and floor décor industry. We pride ourselves on stocking the latest tile fashions from Europe, South America, Asia, and locally. Frequent trips are made to global trade fairs to ensure that the company stays abreast of the latest wall and floor tile industry. Quarries around the world are visited to find the best Marble, Granites and Natural Stone sources.

Finish

Slip Stop - (R9 dry - R11 wet)

Tile Tidbit

What is Slip Stop?

When dry, the surface of the tile has a mat R9 finish. However, when wet, the surface of the tile takes on a more rough finish which is classified as an R11 to minimise slipping in a wet environment.
