3D SLAT WALL PANELS

Our 3D slat panels are created using eco-friendly materials and can be installed horizontally or vertically. These panels are easily attached to the wall with acrylic adhesive or a railing system, which allows them to be screwed into place.

Panel Size: 2400mm x 122mm x 12mm

1. Prior to application, ensure the wall surface is dust and grime free. Remove any existing wallpaper from your wall surface.

2. If required, the panel can be cut to size using a sharp blade or circular saw.

3. Apply an even layer of Acrylic Adhesive & Filler to the back of the panel. Secure panel to the wall by pressing panel firmly to the wall. Panels can also be secured using a nail gun on panel tongue.

4. Wall panel can be installed in both horizontal and vertical direction. Using the simple tongue and groove system, repeat step 3 and then position the next panel into place.

5. For corners, combine two grooved edges. Coordinate mouldings for a neat and professional finish.

3D SLAT WALL PANELS
