

SUFFA.

SUFFA, sofas and lifestyle company was born in 2010 as a brand after 3 decades of experience in the area of upholstery and furniture.

SUFFA is on the market as a global brand, creating cross-border partnerships with various designers and furniture professionals. These arguments are particularly captivating for all internal and external trade to Portugal. The distinction results from the ability to reinvent and research around the problems that the market presents from the perspective of its users, maintaining a compulsive concern about the form and capacity of use of its products being the client's welfare the central objective.

In all SUFFA products, we find a number of technological development processes ranging from the work of the most diverse raw materials to the exploration of processes and mechanisms oriented to the comfort and adaptation of the sofa to the user's position.

The customization allows its customers a wide range of leathers and fabrics in the most diverse colors and combinations and can feed any degree of eccentricity or requirement of the most diverse customers.
