Introduction to woodlam.

A Dedication to South African Design and Craftsmanship

Woodlam has been manufacturing moulded plywood and solid wood furniture to the hospitality and contract industry since 1991. We use timber sourced from sustainably managed forestry operations from both South Africa and overseas and our furniture is 100% locally designed and manufactured in South Africa.

All of our products are crafted to present the best possible design and quality to suit the environment in which they will be used and are made to order according to your choice of wood, wood finish, steel finish and upholstery material. Wooden frames can be stained to enhance the wood grain or painted for a trendy bohemian look. We can upholster any item to suit your specification, including your own choice of fabric.

From Our Founder

"I have come to realise what we've been doing for the past 40 years has much more to do with people and their lives than simply delivering well-made chairs on clients' orders. Every chair that leaves our factory has been made by hand, with the help of technology and laminating presses which date back decades to the way of our Scandinavian forefathers' design processes.

While nothing seems to have changed, everything has, because we have added our own modern South African touch to styling and production to bring products of pride and relevance to the local market.

I have always believed that the most important aspect of furniture design and manufacturing is the people involved in the process, as the people are our craftsmen and women, the heartbeat of our business. Their dedication and skill are the foundation of our quality.

Sustainability, design innovation, and customer satisfaction are values we constantly strive towards, and our goal is to deliver beautifully designed furniture that encompasses these values, creating a fusion of the latest Scandinavian, European and South African designs and craftsmanship.

How does one achieve real customer satisfaction when it comes to furniture? Well, in my view there are a few aspects. We have always tried to make our furniture stronger than it needs to be and ultimately good looking. But really what it comes down to, is that you have to make furniture that is comfortable, otherwise, why have a good looking chair? That's what we have been trying to do over the last 33 years at Woodlam."

- Søren Lassen, Founder
