

HYDRAULIC GLASS WINDBREAK

Hold back the wind and enjoy your space with a **Hydraulic Glass Windbreak** - the latest outdoor innovation!

ADVANTAGES

This modular windbreak system consists of two safety glass panels: **one fixed to the floor** plus a **retracting panel** that raises with a simple touch when required using two internal **hydraulic pistons**.

A maintenance free guaranteed aluminium and glass product to enhance your property and improve your outdoor experience.

Styled like a normal glass balustrade, the secondary glass remains fixed behind the bottom panel until required.

Provides protection from the wind while allowing you to enjoy your outdoor space and view.

1. EUROPEAN QUALITY.

The sturdy aluminium profiles and parts are manufactured in Europe using high-quality materials that have passed the most demanding endurance tests.

3. NO MOTORS OR CHAINS.

The system is extremely reliable and durable, even without maintenance as the retracting glass panels move up and down without motors or chains. Toughened safety glass and regulated speed of action ensures safety and reliability.

2. NO DRILLING.

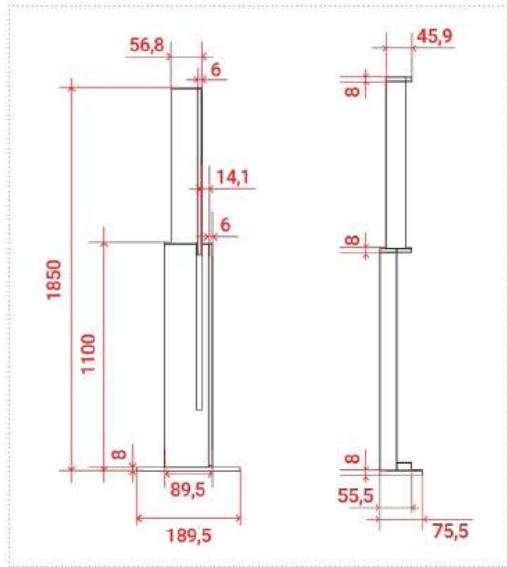

Tempered and/or laminated glass can be used for this system, without any special cut-outs in the glass or screws. The uprights can be powder coated in any colour to match your design environment or corporate style.

4. BEST WARRANTY OFFERED.

2- year warranty on aluminium profiles and system parts, with technical support from our experts and replacements available to guarantee perfect working order.

TECHNICAL DETAILS:

- ⇒ Maximum height, when fully opened: 1850 mm.
- ⇒ Fixed panel height: 1100 mm.
- ⇒ Standard module width: between 1000 mm and 1400 mm
- ⇒ The modules can be joined to make straight sections (180°) or corners (90°).

ALUMINIUM PROFILES

The aluminium profiles used are made of a high-quality aluminium alloy: 6060-T5. This cutting-edge system consists in two vertical profiles for each leg: one fixed and one mobile.

These profiles have been designed to be minimalistic, while maintaining proportions with the base.

CUSTOMISATION:

GLASS

6mm tempered or laminated glass

Solar control glass
Engraved glass
Tinted glass with a solar protection or reflective film.
All powder coating colours available.

RECOMMENDATION:

Commercial and residential areas where wind is problematic.

i.e: pergolas, terraces, patios, porches, barbecue areas, cafeterias, restaurants, shops, decks, sports clubs, viewing decks.
