who are we

Notation Design is a small, owner run business, that at its core produces high quality, unique and modern terrazzo right here in South Africa.

Notation is the team effort driven by Colin and Jenny Armour. A mechanical engineer and graphic designer by trade, they merge their unique skill sets to tackle any problem presented to them.

With 10 years of product solving under their belts and a well trained team they are sure to find the perfect solution for you.

what do we do

We help you achieve your goals by bringing your vision to life.

Whether that means using a standard terrazzo surface we make, creating a unique terrazzo colourway to tie a space together, combining terrazzo and lighting design or developing a completely new product.

If you have a vision for an item we'll find a way to bring it to life. And we can make it match your colour scheme.

Areas of expertise

Casting and mold making
Metal work and fabrication
Prototyping
Product Design and Manufacturing

slabs

We manufacture terrazzo slabs that can be fabricated and fitted like granite or marble, by a stone fabricator of your choice. If you do not have a fabricator we can send you a list of our preferred installers.

Colour plays a huge part in bringing a space together and creating an exact atmosphere. We have spent a significant amount of time sourcing raw materials, aggregate, repurposed materials and pigments that allow us to offer you a wide variety of colour options.

Contact us for our catalogue of standard colourways

custom colourways

product development

While our core business is producing terrazzo tops for applications like restaurant tables, counters and tiles. We also develop completely new products when needed and enjoy tackling tricky ideas that others might shy away from.

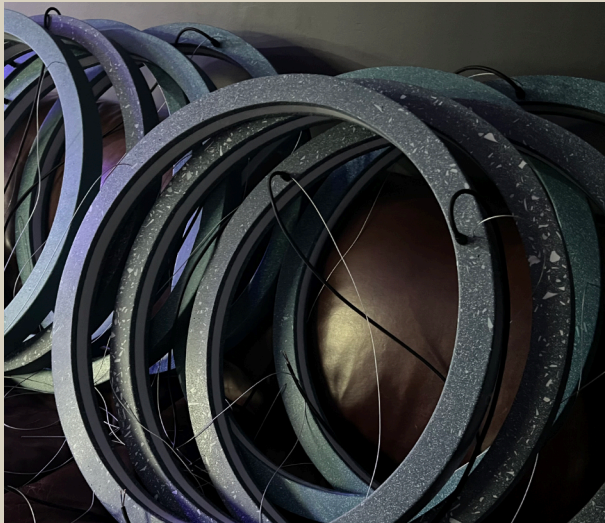

We have two factory facilities where we have amassed various machines and skills over the last 10 years that enable us to bring a vision to life.

lighting design

We have a passion for lighting design and a large range of light fittings that can be customized to suit your project. We are ready to tackle any new designs you might want to bring to life.

lighting design

metal fabrication

We have a full metal fabrication studio that specializes in MIG, TIG and aluminium welding.

We also have our own powdercoating plant to ensure the highest standards

metal fabrication

commercial projects

We have worked on many large commercial projects including lighting and furniture for the head offices of Investec, Anglo American Platinum, AVBOB, Hollywood Bets, BET software and others
