Modern terrazzo

Notation Design is a small, owner run business, that produces high quality, unique and modern terrazzo right here in South Africa.

We started our business in 2015 making small candle holders and vases out of concrete purely as a hobby and a means of getting our hands dirty with a fun creative outlet. Slowly our side hobby grew into a small business and in 2019 we were lucky enough to be able to turn it into our full time job. Now we produce terrazzo furniture and surfaces for the architectural industry as well as private customers.

We have developed a unique concrete mix using only the highest quality ingredients and an ultra performance cement which outperforms standard portland cement in many aspects. Our cement is also more environmentally friendly as it is more efficient to produce than standard portland cement. The aggregates we use in our terrazzo are sourced from various different mines and quarries, as well as off-cut marble from fabricators that would otherwise go to waste. We even use semi-precious stones in some of our unique colourways.

Our product is completely hand made. From weighing out precise amounts of raw materials and building every mold, to mixing and pouring the slab. Once our slabs are cured we grind the surface by hand, to expose the beautiful aggregate. Each step is accomplished with care by a small team of people who have developed the required skills throughout their employment with us. Every piece that leaves our factory is worked on by all the members of our team to produce the amazing one-of-a-kind piece you receive in your home.

Important to note

Lead times

Notation products are handmade and made to order.

Our standard lead time is 6-8 weeks, from deposit payment and colourway confirmation, to dispatch date.

However, if you have a tight schedule, contact us and we'll see what we can do!

VAT and delivery

All prices **exclude VAT and delivery unless otherwise indicated.**

What we do

We manufacture two types of terrazzo surfaces

Finished furniture pieces/table tops. Buy a complete furniture piece or surface that arrives ready to use.

Raw slabs. These slabs are polished and ready for a fabricator to cut and fabricate for any installations.

They are cast without reinforcement and are easily fabricated (cut, laminated, mitered and polished) using the same tooling as marble or granite by a quality stone fabricator. They are **unsealed** and will need to be sealed on site once installed following our installation guidelines.

Raw Slabs for Fabrication

Slab sizes 2400mm x 1000mm x 25mm | 2400mm x 700mm x 25mm
Half slabs and quarter slab sizes available (1200mm and 600mm)

- slabs are through-body concrete and are pigmented throughout
- slab edges are off-form/unfinished
- slabs to be fabricated and cut to size
- back of the slab is not polished
- variation in aggregate is expected

DETAILING

- edges can be straight cut, mitred or finished with an edge of your choice by your fabricator using standard granite tools
- for openings and cut-outs fabricators should rod/epoxy the back of the slabs where the material is thinner than 150mm or the cut-out is larger than 300mm

STRUCTURE & SUBSTRATE

- all slabs must be fully supported with largest overhang being 300mm.
- material is 60kgs per m2 and the support must be able to bear that weight
- standard stone epoxy or silicone can be used to bond surface to substrate
- where substrate is plaster, it must be painted with bonding liquid first to ensure a solid bond
- allow 2 - 3mm seam between slabs
- shim or hand-calibration may be needed to level slabs

Due to the inherent nature of concrete and natural aggregates, no two slabs are exactly alike. They will exhibit variations in tone, aggregate size and distribution. Slabs are hand cast concrete, and as such are not calibrated. Slight variations in thickness will occur and should be accounted for.

Colourways

Colourways are what we call our different terrazzo 'designs'.

All standard colourways are the same price

We have 20 standard colourways but can always make a custom colourway for you.

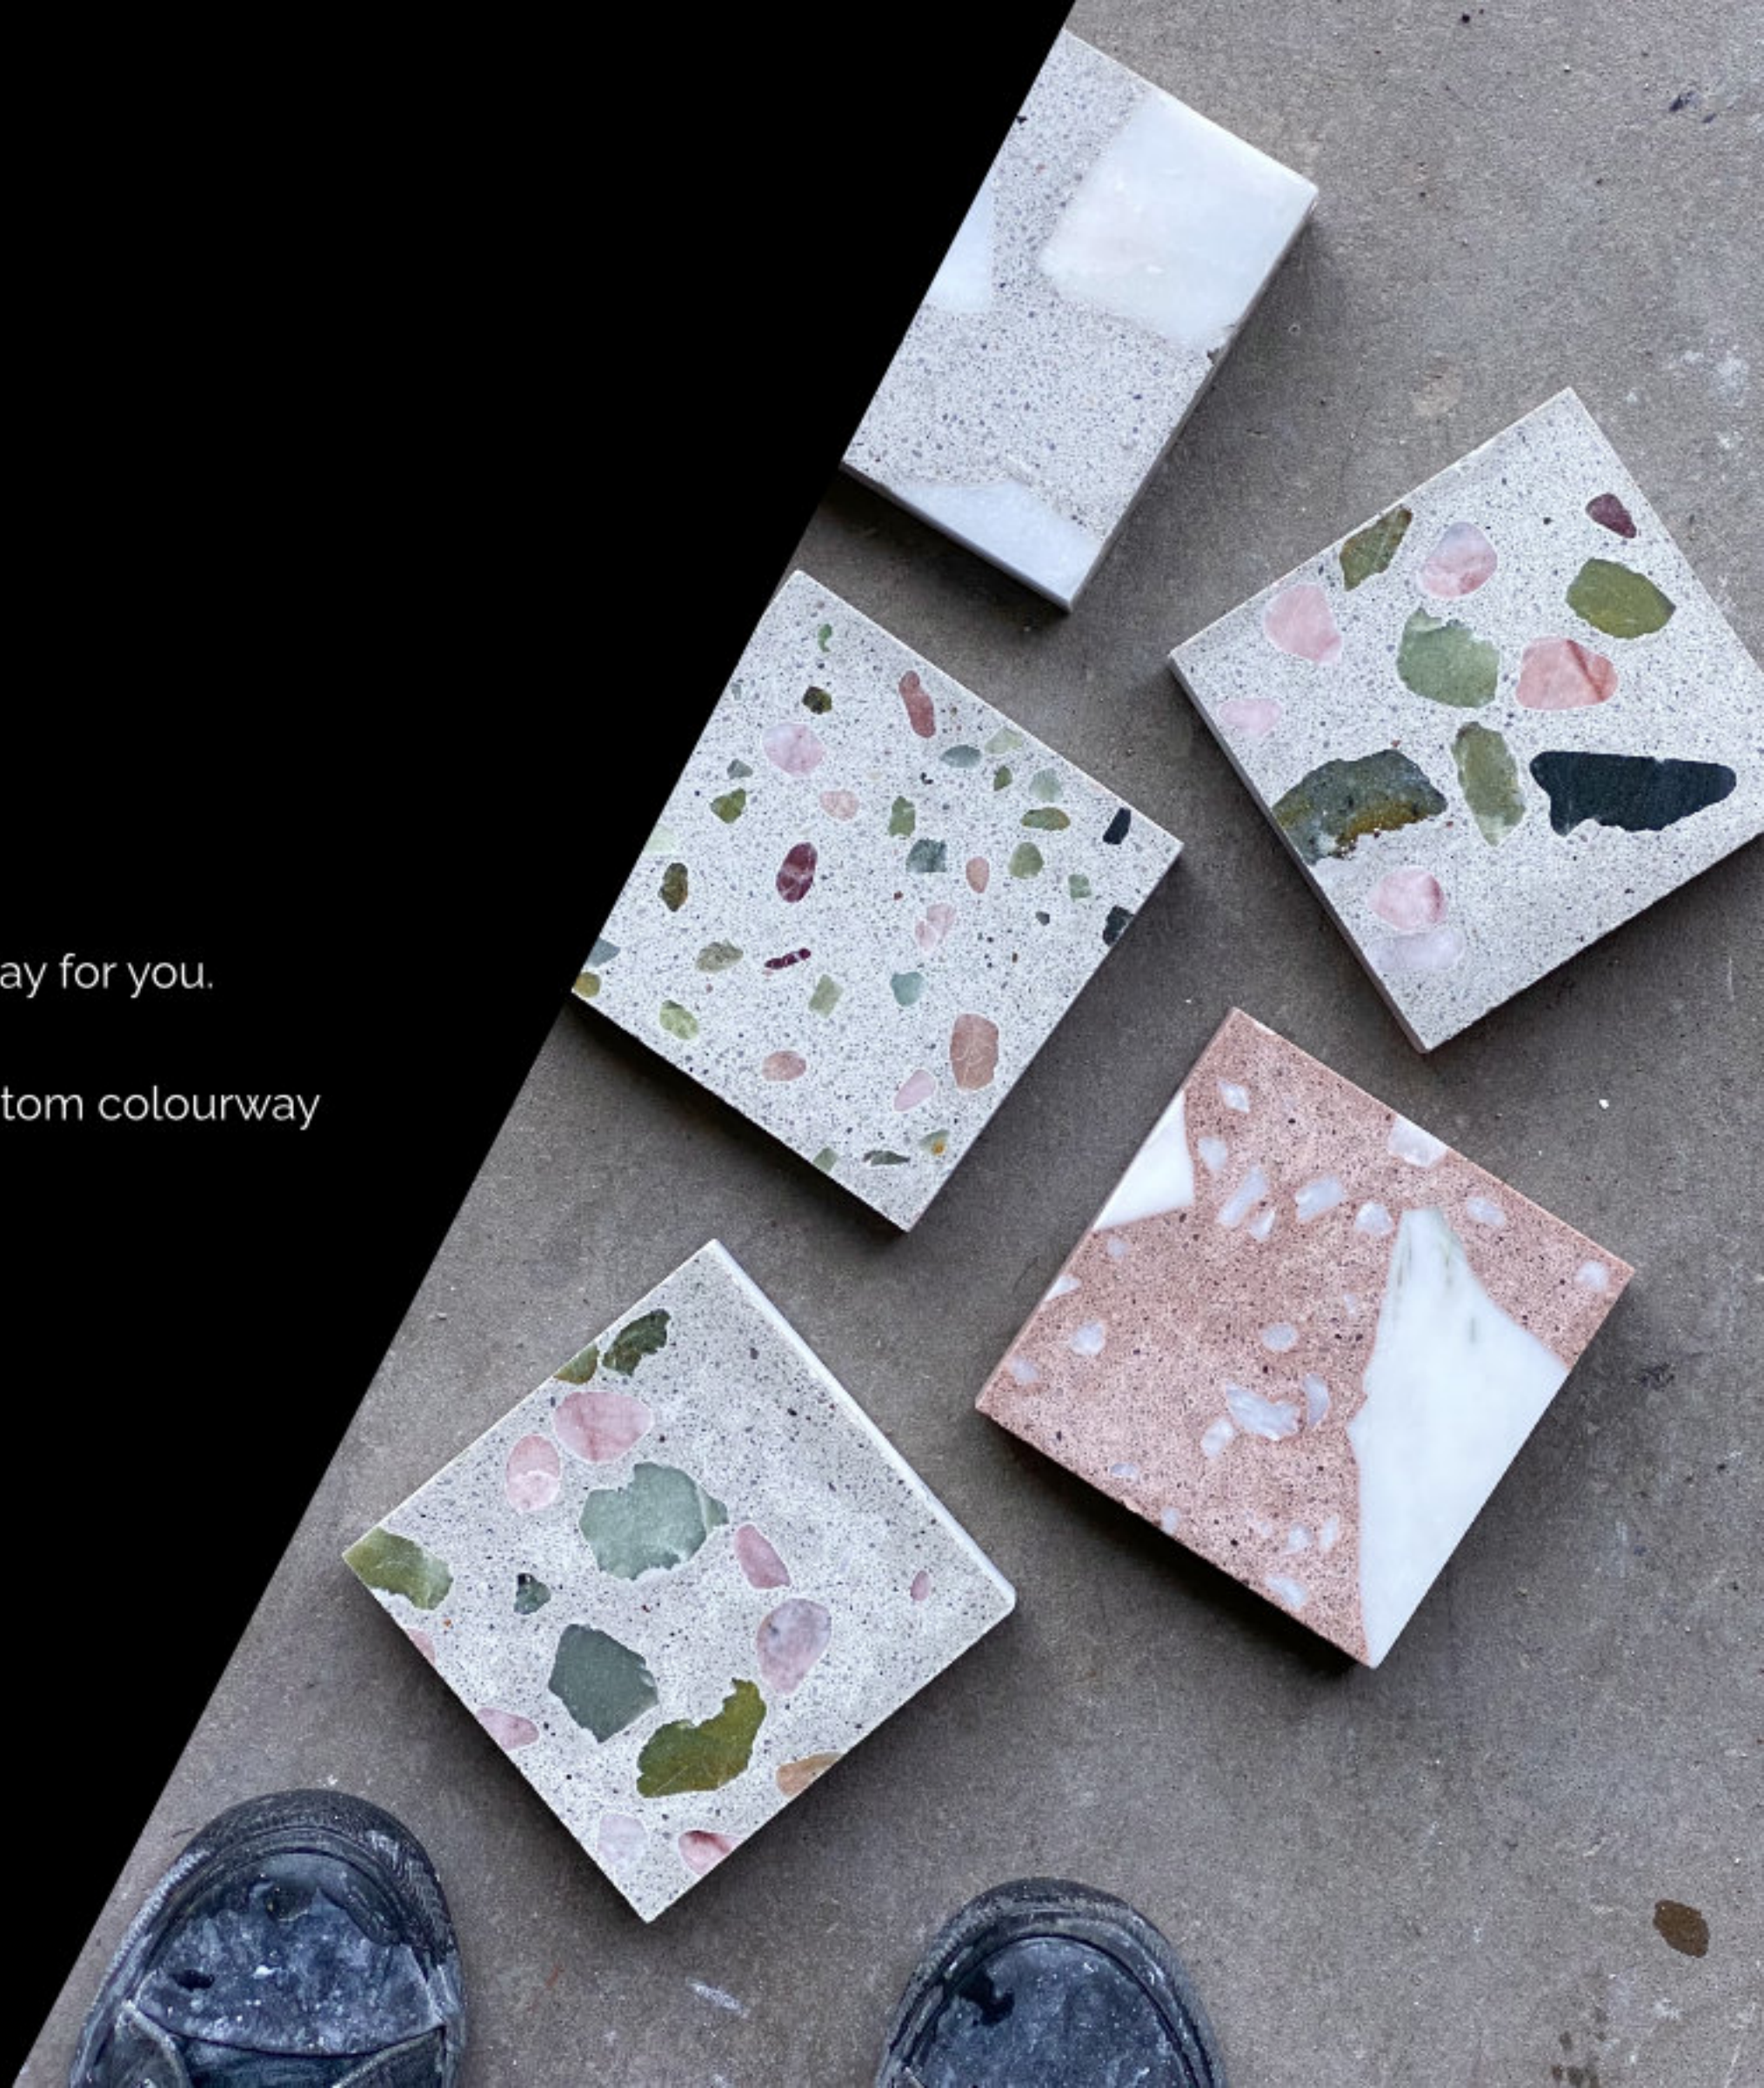

We have samples of our standard colourways on hand and can make custom colourway samples. But these will be charged for and take 2-3 weeks to produce.

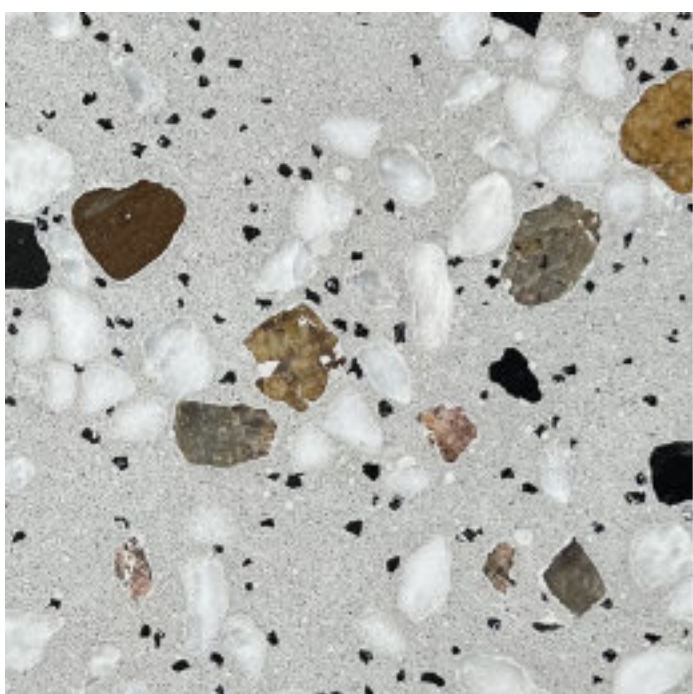

Aggregate sizes

Small 3 - 5mm

Medium 15 - 20mm

Large 35 - 45mm
