Outdoor Steel Powder Coating Care

Care for your powder coated stainless steel & aluminium components by wiping when dirty with a damp cloth soaked in a solution of mild detergent (like Sunlight Liquid) and water. For coastal environments (within 200m of the ocean) it is necessary to make use of Marine Grade stainless steel SS316 and to wipe sea air condensation off of your furniture on a weekly basis. Avoid harsh chemical cleaning products and scratching with sharp objects as this can damage the powder coating.

Dekton Table Top Care

Due to its practically zero porosity, the ultra-compact Dekton® surface is highly resistant to staining in day-to-day use and from chemical products, making it ideal for use as a table top for both indoors and out.

For general cleaning, Cosentino recommends the use of Q-Action with a sponge or soft cloth. If this product is not available, the best option is to use a neutral soap (like Sunlight liquid) and water.

WARNING

Do not mechanically polish the surface. Avoid using metal scouring pads. Whilst the table top material is incredibly durable, they can break when hit with heavy objects.
