The USM universe

USM Haller is the epitome of timeless design: 60 years ago, Fritz Haller and Paul Schärer created a completely new aesthetic – a furniture system inspired by architecture.

4

5

Origin

1

Two visionaries, one idea

After completing his engineer studies, Paul Schärer Jr. joined the family business in 1961. The engineer had big ideas: he wanted to build a modern, industrial factory. He partnered with Fritz Haller, a respected architect of Solothurn school.

Born from architecture

Fritz Haller developed a flexible construction system with various steel modules. This inspired Paul Schärer Jr., who had a bigger vision: interior design that complements architecture. Together, they developed a modular piece of furniture that was predestined for further development.

Furniture with a system

The centrepiece of the system is a chrome-plated ball with six threaded holes. It connects the chrome-plated steel tubes in any combination. Finally, add sheet steel panels, which are powder-coated in various colours. Everything was intended for the company's own offices.

From prototype to USM Haller

When photos of the forward-thinking furniture system with its innovative aesthetics appeared in architecture journals, it was hailed an international sensation. A commission came from the Rothschild bank in Paris consisting of 600 workstations – the company's first major project. Series production began in 1969.

Less is more

With endless possibilities, the USM Haller system can be configured at will and adjusted to changing requirements, in all directions. Its strikingly fascinating minimalism is eye-catching and inspiring for everyone who values design, quality and functionality.

Modern art

An icon of modern design, USM Haller has been on display at the MoMA in New York since 2001 and recognised as a 'work of applied art' since 1988. USM Haller continues to evolve, while remaining true to itself by retaining original characteristics and invites users to challenge their own creativity.

From Münsingen out into the world

Alexander Schärer has headed up this fourth-generation family business since 2000. Production is still carried out at the headquarters in Münsingen. USM employs 500 people and currently has subsidiaries in the USA, France, Germany, UK, Japan and China. USM products are distributed by dealers in over 70 countries. Sustainability has always been a top priority. In 2008, USM was awarded Greenguard environmental certification and received the Cradle-to-Cradle® environmental label in 2018. The vision is to become a fully circular company by 2030.

2

3

- 1 New factory (1963) and office pavilion (1965) in Münsingen, designed by Fritz Haller.
- 2 In 1965, USM Haller was developed to furnish personal use workspaces within visionary architecture, designed by Fritz Haller, furnished with USM Haller.
- 3 Schärer family home (1969), designed by Fritz Haller, tubes, panels; what began 60 years ago continues to inspire today.

Rethink, redesign, revalue sums up the sustainable benefit of our products. USM furniture is a valuable companion for life, across generations.

rethink

What and how much do you really need? What purposes should a piece of furniture serve?

Experienced consultants and virtual planning tools enable us to support you to create a bespoke and conscious purchase. So that you get exactly what you really need, tailored to your current requirements. But don't worry, once furniture has been designed, it can always be rethought and adapted to new circumstances.

Each piece is unique, planned and assembled especially for you. Our furniture is designed to be forever reconfigured.

Thanks to the high-quality finish and clever design, all components can be changed and extended at any time without any problems. This leads to limitless creative freedom, more individuality in design and almost infinite cycles of use.

re design

Sustainability

Thanks to the high quality, colours that never fade and a 100% modular system, decades-old USM furniture can be seamlessly combined and upgraded with new components. We believe a product that adapts to your style, your life, your changing needs is relevant and loved.

re value

Our vision:
Becoming a fully circular business

We want to extend circularity principles beyond our products. That means adopting this philosophy throughout our company – from our product development to our manufacturing, and new business models, from our communications to our supply chain, operations and the expertise of our people.

USM furniture is a valuable companion for life, across generations.

Our product lines USM Haller and USM Kites M, accounting for more than 92% of our revenue, carry the Cradle-to-Cradle® certification. It is the leading multi-attribute standard used globally across industries for designing and making products that enable a healthy, fair and sustainable future according to the world's most advanced science-based measures.

All four of our main product lines carry the UL Greenguard Certification for low chemical emission. Having undergone rigorous scientific testing to meet stringent emissions requirements, this certification confirms that our products contribute to a healthier indoor air quality.

www.usm.com/sustainability

Building future-proof possibilities:
Our core values run deep and permeate every element of what we do – from building furniture to building relationships.

9

Values

8

Strength and Durability
 Produced with the same high quality since its invention 60 years ago, the USM Haller system relies on a unique structural system composed of chromed tubes joined by connecting balls and thermo-lacquered panels, resulting in remarkable durability and timeless style.

Low Cost of Use
 The outstanding durability and adaptability of USM, as well as the possibility of endlessly reconfiguring furniture regardless of initial function, guarantee a reduced cost of use over time.

Coherence of Furniture
 Thanks to its unique modular design, the USM system can meet all furniture needs.

Small Footprint
 The strong, sleek and compact structures, achieved by an exemplary quality of construction and choice of materials, allow USM to demonstrate a great conservation of precious space.

Timeless Aesthetic
 Invented by architect and industrial visionary Fritz Haller at the beginning of the 1960s, the USM Haller System is characterised by a globally recognised, timeless design that complements buildings' architecture.

Evolving Design
 USM furniture isn't static; it can be reconfigured to follow the evolution of users' needs, even after many years. Whether there are changes in use or size, new components will always be compatible with older USM Haller system products.

Adaptation and Innovation
 Thanks to its great ease of installation/dismantling, USM furniture is capable of forever adapting itself to the rapid evolution of technical equipment. Retrofittable at any time.

Sustainable Development and HQE Standards
 USM was the first company in Europe to receive the Greenguard International certification by creating furniture that is coherent with the environmental initiatives of buildings. In 2018, USM Haller and USM Kitos M achieved Cradle to Cradle® certification.

Founded in 1885, the USM family-owned company is now managed by the fourth generation. Synonymous with adaptable, timeless design, the USM brand stands for quality and precision, high-quality raw materials, meticulous artisans and unconditional dedication. Driven by customer interest and respect for the environment.

Sustainable production in harmony with nature

Our manufacturing site in Münsingen is located in the heart of a diverse cultivated landscape. We have designed around 7,000 m² of the surrounding area to be close to nature – creating a valuable habitat for native plants, animals, and birds. For this commitment to promoting biodiversity, we were recognised by the Nature & Economy Foundation – a testament to our responsibility towards nature and the environment.

Norvento reinvents its workspace

With over four decades of experience in renewable energy and energy efficiency, the Spanish company Norvento Enerxía demonstrates its ongoing commitment to innovation and the environment at its headquarters.

In 2016, the company constructed a zero-energy building in Lugo, northern Spain, designed by architect Francisco Mangado.

This project had four key requirements: environmental responsibility, employee comfort, scalability for future growth, and reflecting the design passion of Norvento President Pablo Fernández Castro.

To meet these requirements, Norvento chose the USM modular furniture system for its headquarters, known for its outstanding modularity and durability.

The system seamlessly integrated into the workspace and met the company's expectations for adaptability and design.

As Norvento has grown and changed over the years, the company recently redesigned its office to better accommodate new workflows and promote greater collaboration. Instead of replacing the existing furniture, Norvento transformed its workspace into a completely new environment by reconfiguring the USM Haller systems.

The original furnishings were easily dismantled and reassembled to create new breakout areas, flexible collaboration spaces, and seating areas. Furthermore, the installation of planters, as well as perforated and sound-absorbing panels, improved acoustics and created an environment conducive to well-being, creativity, and performance.

As the centerpiece of Norvento's redesigned workspace, they provide added value, enhanced comfort, and reflect the company's commitment to sustainability and innovation.

The newly configured furniture demonstrates the adaptability and timeless quality of this classic modular design.

stories:

123

Collabo- rate

Encouraging collaboration

Opportunities for interdisciplinary collaboration encourage team spirit and innovation. Creative zones for brainstorming, group workstations, and spaces to relax and find inspiration – with USM, you can create dynamic solutions with lasting value, where teams can truly excel.

*Fostering teamwork,
sparking innovation*

Adaptation points

Flush-mounted adaptation points in the tabletop ensure clean cable management and accommodate accessories such as monitor arms or USB ports, using the plug-and-play principle.

*Easily
connected*

Grommet hatch for network access

Discreet grommet hatches in the tabletop allow meeting participants to connect to power and networks at any time.

125

126

Connecting people

Today's workplace gives users the choice of where and how they want to work. Office spaces must support different ways of working – offering the flexibility to come together or meet in more focused settings. Large USM Haller tables provide employees with greater freedom in how they meet, while USM Privacy Panels create quiet zones. Central gathering points can be formed using the USM Haller modular system.

127

Streamlined offices

USM Kitos tables provide a flexible office solution for any team. The system supports both individual and collaborative work, adapting to whatever the situation requires. Manual height adjustment offers hassle-free flexibility.

128

One team, one table

Get together at one large desk. USM Haller offers three-metre-long desks that create work islands within a flexible work-space. Tabletop adaptation points allow maximum individualisation with smart accessories such as lamps, USB ports or protective screens, as well as hatches for network access.

All measurements in mm.

USM Haller Soft Panel

The USM Haller Soft Panel adds a soft and playful touch to the USM product range. The textile panels come with four magnets and can be easily clicked into the tubular structure of the modular furniture system – no assembly or additional fixtures required. It's just as easy to fold them up or down to open and flip into the next compartment. And of course you can turn things round at any time or position them somewhere else in the furniture.

190

191

The USM Haller Soft Panel is made of high-quality synthetic fibre, with 40% recycled marine plastic. Lightweight, stable and renowned USM durability. Soft to the touch and a warm aesthetic – providing a surprising contrast in the metallic world of the classic design. Another special feature: the panels reduce noise and improve room acoustics. This is typical USM: design, functionality and sustainability in symbiosis.

There are three patterns to choose from: curved, diagonal and vertical grooves.

Mono Panels are designed with the same pattern on both sides (either diagonal or curved grooves) and in a single colour. Available in 6 colours.

Two tabs make it easy to flip the panels up or down.

Four magnets secure the panel within the furniture's structure.

Duo Panels have vertical grooves on one side, are plain on the back, and available in 6 various colour combinations.

Polyester fleece with 40% recycled marine plastic content

USM Haller E

The modular structure of your design, either completely or partially equipped with e-Balls and e-Tubes, is connected to a source of electricity. The structure itself conducts the low voltage electricity to the desired location using the e-Balls, e-Connectors and e-Tubes to form a circuit, USB chargers or light sources can be snapped into place in pre-cut recesses. The power supply is drawn from any point near the ground. The power supply cable is attached to an e-Ball, and the power adapter is subsequently tucked underneath the furniture until only the operating switch remains visible. From this point, the power supply requires no further cables as it is integrated into the structure of the furniture.

Application options

- 1 Glass panel**
Glass elements can be illuminated throughout.
- 2 Without metal paneling**
Compartments without metal paneling can be completely illuminated.
- 3 With metal paneling**
Compartments with metal paneling can be illuminated from the front.
- 4 Compartment with an extension shelf**
The entire compartment with an extension shelf can be illuminated.
- 5 Drop-down and extension door**
Via the "Light when Compartment Is Open" function, the light turns on when the door is opened.
- 6 Angled shelf**
The presentation space is illuminated from the front.
- 7 Floor lighting**
With floor lighting, the light shines at a 25-degree angle under the furniture.
- 8 Ambient lighting**
The light is directed vertically towards the back, illuminating the surroundings with a warm glow.
- 9 e-USB charger**
It can be integrated in the same places as the e-Lights.

e-Elements

- 1 e-Lights**
Dimmable, available in
- Warm white 2700 Kelvin
- Cold white 5700 Kelvin
Both with or without the "light at compartment opening" function.
- 2 e-USB charger**
Provides a voltage of 5 volts to the connected device. (Capacity: 6,5 W)
- 3 e-Dummy**
Sleek, black e-Dummy element, closes recesses that are unutilised. Can be changed for additional e-Lights or e-USB charger later.
- 4 e-Tube (power outlet)**
Tubes with recesses for e-Lights, e-USB chargers or e-Dummy elements that can be easily snapped into place or replaced.
L 350, 1 recesses
L 500, 2 recesses
L 750, 3 recesses
- 5 e-Tube (conductive)**
The conductive e-Tube serves to conduct the electricity, if no inserts are desired in this location. It is available in lengths of 750, 500, 395, 350, 250 and 175 mm.
- 6 e-Ball e-Connector**
To enable the flow of electricity, the ball and connector were refined. The exterior dimensions remain unchanged. The distinguishing feature of the ball is the black insulation ring.
- 7 e-Power supply**
Includes dimmer at the operating switch. Transforms the power supply voltage to 24 volts. (Capacity: 60 W)

USM Haller Tables

The classic par excellence: USM Haller tables are stylish and durable. Whether as a timeless dining table, a highly individual work desk, or in an elegant meeting room, they make a strong impression. Their timeless elegance ensures they pair well with other pieces from the USM Haller collection. Legs and frames made of chrome-plated steel ensure maximum stability, while high-quality, hard-wearing surfaces and high-precision by Swiss specialists guarantee a long service life.

Dining

Home office

Office

Meeting

USM Haller Classic

Perfectly coordinated with the USM Haller modular furniture system, with its clean lines and versatile surfaces, the table is just as suitable for offices as it is for a dining table. Elegant, timeless and iconic.

Living

Lounge

USM Haller Side Table

Square or rectangular, design the perfectly proportioned coffee table. Choose a surface that blends into your living room.

Office

USM Haller Plus

The USM Haller Plus Table has two removable adaptation points, allowing accessories to be quickly and easily mounted for streamlined cabling.

Office

Executive office

USM Haller Advanced

The most convenient table type: the tabletop slides forward for easy access to the integrated cable tray. Adaptation points can be fitted with smart accessories and USB ports.

USM Kitos Tables

Continuously height-adjustable, maximum stability and customisability with smart accessories, this table allows you to work ergonomically and efficiently at all times. Ideal for sharing or as a dynamic individual workstation.

USM Kitos M/E Plus

With this option, two adaptation points recessed into the tabletop allow for easy connection of accessories. In addition, the tabletop slides forward for quick access to the spacious cable tray underneath.

Ergonomic office

Sit to stand

Highly individualised

Desk sharing

USM Kitos M

Work sitting or standing. Thanks to a patented mechanism, the USM Kitos M model adapts continuously to the user's anatomy in a matter of seconds, all without any power consumption. Perfect for sharing. Also available as USM Kitos E with electronic height adjustment.

Meeting

Side table

Sit to stand

USM Kitos Freestanding

Equipped with an energy-saving height adjustment system, the freestanding round or square tables can be used for a quick meeting or temporarily transformed into a seated workstation.

Meeting

Collaborative work

Sit to stand

USM Kitos M/E Meeting

Extra-large, height-adjustable and extremely stable, perfect as a meeting table and for collaborative working. Optional grommet hatch in the tabletop provides quick network access.

Sit to stand

USM Kitos

An elegant workstation, meeting table or complex workstation, USM Kitos is a technical icon and electrically height-adjustable.

USM Kitos M/E Table

Each table of the USM Kitos M and E family offers integrated smart solutions for electrification, excluding freestanding.

Why USM Kitos M?

The "M" in its name stands for mechanical spring-loaded height adjustment; adjustment time approx. 1 second with zero energy consumption. This system is more than 10 times faster than the electronic equivalent and has an extremely long operating life.

Why USM Kitos E?

Maximum functionality and captivating design – USM Kitos E unites all requirements in one modern workplace: continuous height adjustability and maximum stability. A distinction is made between fixed and motor-driven legs in the E1, E2 and E3 models.

E1

H: 740
With or without middle traverse

E2 with 1 motor

H: 700–1200
Adjustment time approx. 30 sec.
With middle traverse

E3 with 2 motors

H: 650–1300
Adjustment time approx. 20 sec.
With middle traverse

Accessories for all USM Kitos M/E Table

- Grommet work access**
Hatch for a single power outlet, flush-mounted in the tabletop. This unit can be mounted in two different positions on the tabletop.
- CPU holder**
The CPU holder allows computers of various sizes to be mounted either under the tabletop facing outwards or on the middle traverse facing outwards or inwards as desired.
- Link chain**
Holds and directs cables to the power source. Flexible and adjustable to various lengths.
- USM Privacy Panels**
Fitted on the long side of the table to provide individualisation and privacy. For tables with H: 350 or 700. For tables with H: 2500, 2250, 1800, 1750, 1600.
- Flat screen pivot arm**
Screens are screwed to the height adjustable pivot arm using a mounting plate (VESA standard). Available for USM Kitos E and M tables: the pivot arm is mounted onto the tabletop using the universal support. Available for USM Kitos M and E Plus: The pivot arm can be inserted into one of the adaptation points with a tube set. Continuous height adjustment for screens weighing up to 12 kg.
- Front panel**
Can be attached under the table to the long side. For tables with heights: 1800, 1750, 1600.
- Material tray**
Provides room for writing instruments and can be discreetly stowed under the tabletop.

Accessories for USM Kitos M/E Plus Table

- Flat screen support arm**
Screens are mounted onto the support arm (VESA standard) which can be connected directly to one of the adaptation points. Swivel-type with a spherical joint for the screen. Mounting at different heights is possible for screens weighing up to 12 kg.
- Flat screen support bar adjustable**
Move forwards or backwards two notches at a time to adjust the viewing distance.
- USB adapter**
The adapter can be used for USB A 3.0 and C connections. It can easily be inserted into the adaptation point. Usable as power supply or for data transfer.
- Lamp peg**
An optional lamp peg for easy attachment of selected table lamps. Electrification is possible through the adaptation point, adjusted with ball joints.

Accessories for all USM Kitos M/E Table, except USM Kitos M/E Meeting

- Flat screen support arm**
Screens are mounted onto the support arm (VESA standard) which can be connected directly to one of the adaptation points. Swivel-type with a spherical joint for the screen. Mounting at different heights is possible for screens weighing up to 12 kg.
- Flat screen support bar**
The bracket is inserted into the adaptation points. Up to two screens (max. 2 x 12 kg) can be attached using a mounting plate (VESA standard). Screens can be mounted at different heights; screens can be adjusted with ball joints.
- Lamp peg**
An optional lamp peg for easy attachment of selected table lamps. Electrification is possible through the adaptation point, adjusted with ball joints.

Basic table

Integrated cable tray underneath the tabletop
Adaptation points for accessories

Sliding tabletop

Integrated cable tray accessible from above by sliding back the tabletop

Side table

Integrated cable tray underneath the tabletop and accessible from all sides

Extra size

Integrated cable tray underneath the tabletop and accessible from all sides

USM Privacy Panels

Expandable at any time with individual elements, USM Privacy Panels playfully create zones in open spaces and guarantee privacy. Available freestanding or added onto a tabletop.

Modern workspaces

Glass, concrete, open spaces – an architectural dream, but a nightmare for acoustics. USM Privacy Panels help to optimise acoustics in any room.

Room acoustics

Modular zoning

Privacy

USM Privacy Panels

206

USM Privacy Panels are a flexible and extendable modular system made up of individual panel units. Each panel unit consists of two layers of molded polyester fabric with a tubular cross-beam. They can be used freestanding or mounted on tables to divide up the workspace, ensure privacy and absorb unwanted noise.

Winner of the German Design Award 2017

Winner of the Design Preis Schweiz 2015/16

207

The panels are available in two sizes: a smaller version measuring 250 x 350mm and a larger version measuring 750 x 350mm. These dimensions are chosen to match those of the USM Haller system and tables as well as USM Kitos tables. All measurements refer to the distance between axes.

All measurements in mm.

USM Inos box

208

The perfect solution for organising the interior of your USM furniture, compact and stackable.

Interior organisation

Stackable

The USM Inos box is available in four sizes to suit your needs, matching to the dimensions of the USM Haller modular furniture system. The interior can be divided with metal inserts. The boxes and trays are made of polyester fleece, available in two colours.

USM Inos drawer set

209

This storage solution fits perfectly into USM Haller furniture to store small items. The choice of colour allows you to add stylish accents to your USM furniture, both inside and out.

Interior organisation

The drawer sets are perfectly matched to the dimensions of the USM Haller modular furniture system. The closed 5 drawer set is available in all 14 USM colours. The open or closed 10 drawer sets and the open 5 drawer sets are available in graphite black and pure white.

Our lived realities are in a constant state of change – shaped by new challenges, evolving work cultures and a lifestyle that continues to develop over time. At the same time, the boundaries between living and working are increasingly dissolving – as is the clear distinction between specifically and hybrid-used public and semi-public spaces.

USM has been responding to this dynamic for over 60 years, playfully, with a modular furniture system that can be precisely tailored to personal style, individual needs and spatial conditions – right from the design phase – and can evolve over generations.

This open system inspires highly individual solutions – as playful, versatile and unique as the people who use them. From compact design classics for everyday use to multi-functional spatial elements for hybrid environments.

Crafted in outstanding Swiss quality, USM stands for enduring, value-driven companions through change – whether at home, at the office or somewhere beyond.
