

Motor, Gear & Fan > Brushless Motor > (#MT-0032) Hackmoto V 13.5T 540 Brushless Sensored Motor

(#MT-0032) Hackmoto V 13.5T 540 Brushless Sensored Motor

Model : MT-0032
(#MT-0032) Hackmoto V 13.5T 540 Brushless
Sensored Motor

Description:

Yeah Racing's newest Hackmoto series of motors, designed with performance in mind! Using oversized copper wires, the internal resistance of the motors has been lowered. Oversized angle copper tabs allow for a large area to solder wires onto. The motor case has been lightened as much as possible to reduce the weight which allows racers to easily balance their cars and aids with cooling.

*Photos for reference only. Motors are of a "Outlaw" Spec.

Feature:

?For: 1/10 RC Car

Motor, Gear & Fan > Brushless Motor > (#MT-0032) Hackmoto V 13.5T 540 Brushless Sensored Motor

(#MT-0032) Hackmoto V 13.5T 540 Brushless Sensored Motor

?Material: Aluminum
?Color: Black
?Premium Quality Ball Bearings
?High Purity Copper used in Windings
?Removable/Replaceable Rotor
?High Power Neodymium Magnet
?Sensor-based for Excellent Torque and Low-Speed Throttle Smoothness
?Sensor-based for Precise Timing and Turbo Timing function for exceptional Acceleration and Top Speed.
?Aluminum Endbells For Light Weight and better heat dissipation
?Venting Holes Engineered Carefully For Efficient Air Flow, Cooling and weight reductions

Include:

?Hackmoto V Brushless Sensored Motor (1 pc)
?Sensor Cable (1 pc)

Motor, Gear & Fan > Brushless Motor > (#MT-0032) Hackmoto V 13.5T 540 Brushless Sensored Motor

(#MT-0032) Hackmoto V 13.5T 540 Brushless Sensored Motor
