

SoundPro 412 UC – Experience professional communication in highest wideband audio quality

The SoundPro 412 UC is a modern user-friendly USB headset available in monaural (with one earphone) and binaural (stereo, with two earphones) versions. With its captivating Swiss design, it supports excellent wearing comfort. The SoundPro 412 UC was designed for the modern PC workstation. The high speech quality as well as the passive ambient noise give the user a real advantage.

Comfortable wearing style

The large ear posters in combination with the flexible holding rings guarantee that they can be worn without unpleasant pressure points. The adjustable headband can be easily adjusted to the individual head shape. Even after long phone calls or listening to music, it feels as if the headset had been put on first.

Unique communication

They are always understood. The high-quality microphone at the tip of the discrete microphone boom absorbs disturbing ambient noise thanks to its noise-canceling technology. The high-quality receiver supports your conversation with crystal-clear sound. So you can stay focused on your conversation without getting tired and don't lose sight of your conversation partner.

Plug & Play made easy

With its integrated call control, the SoundPro 412 UC offers a wide range of functions and excellent convenience for working with Skype for Business and other softphone clients. The integrated LED button illumination gives the in-line controller a professional touch.

Control unit with USB connector

New ultra-elegant microphone
