

Ride Effortlessly

Ride anywhere effortlessly with the Acer ES Series 3, an e-Scooter that folds and unfolds easily, featuring a user-friendly display, multiple speeds, and extreme portability weighing at just 16 kg. The 7.5 Ah battery charges in just 4 hours.

Modern Design

The minimalist design and black body features inner tube cable routing and an LED display that shows speed, battery level, and other data.

3 Speed Modes

Three speeds make it easy to switch between casual cruising at 6 km/h, commuting at 10 km/h, or somewhere in between at 20 or 25 km/h. (Depends on countries regulations)

Powerful Motor

The 36V/250W hub motor dependably propels commuters to their destination whether the road is flat or inclined.

Flat Tire Proof

The rubber tires are flat tire-proof thanks to innovations in rubber tire technology.

Long Distance Range

The large battery can handle long distances on a single charge, giving you peace of mind.

More Room

The 60L x 16.5W cm platform gives more space for steady footing and a safer, smoother ride.

Turning Light

Using the turning light while riding your eScooter is an effective way to promote safety and prevent accidents on the road.

Hardware Upgrade

Pass waterproof test IPX5, thoroughly improved the durability and safety.

Specifications
