

# Go Mic Mobile

## Professional Wireless System for Mobile Video

 WIRELESS

### POSITIONING

Samson's Go Mic Mobile is the world's first professional wireless microphone system for smartphones, allowing mobile filmmakers/ journalists to capture incredible audio anywhere via a compact, dual-channel receiver that mounts and connects directly to smartphones, tablets, digital cameras and tripods. Available in handheld microphone and lavalier microphone with belt-pack transmitter configurations, Go Mic Mobile captures the sound of your stories, *without wires*.

### FEATURES

#### Mobile Video Connectivity

Go Mic Mobile connects directly to your Apple iPhone and other iOS devices via the included Lightning cable, or into Android\* devices via USB Micro B or USB-C cables (both included). Mobile filmmakers and videographers can easily mount the system's dual-channel receiver to smartphones, tablets, digital cameras and tripods using the included mounting accessories (bracket arms, hook-and-loop fasteners, 1/4"-20 adapter, shoe mount adapter).

#### Wireless Technology

Go Mic Mobile transmits uncompressed, low latency audio without video sync issues and can operate up to 100' within the 2.4GHz frequency band. A 10Hz-22kHz frequency response ensures the highest quality audio reproduction, and a 48kHz bitrate provides greater than CD-quality sound.

#### Dual-Channel Receiver

Available in two microphone transmitter configurations (Q8 dynamic handheld mic transmitter and LM8 omnidirectional lavalier mic with belt-pack transmitter), Go Mic Mobile features a dual-channel receiver that can transmit and mix digital audio on two separate channels. The receiver's rechargeable lithium-ion battery offers up to 13 hours of wireless operation, and won't drain your smartphone battery. It also features an 1/8" headphone/line output for monitoring or connecting to an analog input (1/8" cable included).

\*Go Mic Mobile offers digital audio compatibility with Android devices running Android 5.0 (Lollipop) or later that allow USB digital audio connectivity. Not all Android applications support USB audio, and you may need to download a third party app to use this feature. Analog connectivity via the included 1/8" (3.5mm) cable is offered as an alternative solution.

### APPLICATIONS

- Mobile filmmaking & journalism
- Live streaming
- YouTube video production
- Podcasting/video blogging

### SPECIFICATIONS

#### Go Mic Mobile Wireless System

Simultaneous Systems .....	3
Working Range.....	100' (30m) line-of-sight
Working Frequency.....	2.404-2.476GHz
Frequency Response .....	10Hz-22KHz
Signal To Noise .....	90dB (A) with mic at minimum gain 78dB (A) at maximum gain

#### Go Mic Mobile Receiver

Max. Analog Audio Output Level .....	From headphone jack: +6dBu, = 4.4Vpp, = 70mW per side into 32Ω headphones
USB Audio Sample Rate.....	48KHz
USB Audio Support .....	Windows, mac OS, iOS, Android, Linux
Battery Life.....	Up to 13 hrs. (int. rchrgbl. Li-ion battery)
Mic Transmitter Elements.....	Q8 dynamic handheld, LM8 omni lavalier
RF Power .....	<10 mW EIRP
Connector Cables .....	Lightning, USB Micro B, USB-C, 1/8"
Accessories.....	bracket arms, hook-and-loop fasteners, 1/4"-20 adapter, shoe mount adapter, USB charge cable, power adapter
Gift Box Dimensions .....	11.5" x 7.75" x 2.5"
Gift Box Weight.....	HH: 1.66lb (0.75kg) LAV: 1.39lb (0.63kg)
Master Carton Quantity .....	12
UPC (US only).....	HH: 809164219156 LAV: 80916421917
SKU (US only).....	HH: SWGMMSHH8 LAV: SWGMMSLAV
