Evapolar patented EvaBreeze technology makes a revolution in personal health and comfort

EvaBreeze materials are built from mineral nano-fibers that provide a set of unique properties to Evapolar products:

- ✓ 100% non-organic
- ✓ Bio stability – prevents bacteria growth
- ✓ Outstanding capacity of liquids absorption
- ✓ High efficiency of liquid evaporation
- ✓ Chemo stability – can absorb and evaporate not only water but aggressive liquids
- ✓ High filtration accuracy and capacity
- ✓ Non-flammable

This set of advantages makes Evapolar outclass the competition.

**Embodiment of a designer's idea
and usability, all in one device.
That is what Eva-500 represents.**

- ✓ enlarged water tank --> working hours increase up to 9 hours
- ✓ an intuitive and easy to understand user control pad
- ✓ reduction of the power consumption to 7,5 W
- ✓ reasonable retail price meets the expectations of a wide audience

evaCHILL EV-500

Coverage Area	Up to 3 m ² / Up to 33 ft ²
Power Consumption	7,5 W
Cooling Power	100 W - 350 W / 340 - 1190 BTU/hr
Volumetric Flow Rate	49.1 cfm
Noise Level	Up to 50 dB
Size	172 x 170 x 170 mm / 6.77 x 6.69 x 6.69 inch
Net Weight	750 g
Water Tank Capacity	800 ml
Water Refill Cycle	every 3-8 hours
Evaporative cartridge life expectancy	3 - 6 months
Color	White, Grey
Energy Efficiency Ratio (EER)	21-37
Power Supply	USB Type-C
Supplied Accessories	Cartridge, power cord, funnel

Chills the air

Uses natural evaporative cooling effect to drop the air temperature

Humidifies

Humidifies the air creating a better working environment. Can be used as a humidifier in winter

Purifies

Filters out dust particles to increase the air quality for better breathing

Portable

Can work everywhere via USB power supply

Eco-friendly

No toxic Freon-like liquids, consumes only 7,5W of electricity. Uses fully biodegradable evaporative pads

Stylish design piece

Elegant, compact and stylish, evaCHILL is a real design piece

What for?

Comfortable working conditions are a guarantee of high productivity. However, modern air conditioning systems do not always fully meet the individual requirements of employees. With Evapolar devices you will no longer freeze with an open window or be in a stuffy place all day.

Creating a personal comfort zone is the best solution in the office environment at any time of the year.

Advantages:

- + consumes only 7,5 W
- + cools the zone only around the user in an area of up to 3 m²
- + increases working capacity
- + filters out dust particles and improves air quality

What for?

The guarantee of healthy and sound sleep of a child is the maintenance of the temperature range and clean air. Evapolar devices make sure to create comfortable conditions for your children.

Advantages:

- + maintains a comfortable temperature in the child's room all night
- + works on the same water tank up to 6 hours
- + colourful LED-backlight replaces the night-light
- + works quietly, does not disturb the child's sleep

What for?

Reorganisation of the hormonal background in women is often accompanied by sudden changes in body temperature, dizziness and other indispositions.

Advantages:

- + cooling of the personal zone
- + the ability to continue to do business in the habitual mode
- + the device is portable, can be used where necessary
- + works both from the network and from mobile power sources

What for?

Nowadays, a healthy lifestyle is an important topic for every person. Evapolar devices will create the essential comfort for individual and group sport activities.

Advantages:

- + the device is portable; it is possible to do sports in any comfortable place
- + does not contain organic substances that can lead to multiplication of pathogenic bacteria and mold
- + works both from a network and from mobile power supplies

What for?

With the presence of skin diseases and respiratory system problems, the requirements for the temperature range and the degree of humidity in the room are increased.

Advantages:

- + consumes only 7,5 W
- + sorts out dust particles and improves air quality
- + possibility to adjust the cooling capacity
- + cooling personal space in the area up to 3 m²
- + the device can be taken to school, to work or to travel

What for?

Dry air in winter in the apartment (as a consequence of the central heating system) is the cause of increased risk of colds, skin, mucous and lung problems.

Advantages:

- + consumes only 7,5 W
- + moisturises the air, creating a more favourable environment in the cold season
- + does not contain organic substances that lead to the multiplication of pathogenic bacteria and mold

What for?

Devices of Evapolar company can be used as an addition to the air conditioning system, saturating the dried air, and as a separate device - by cooling, moisturising and cleaning the air.

Advantages:

- + consumes only 7,5 W
- + cools, cleans and moistens the air around
- + the device can be controlled via Smart Home and mobile application

What for?

Favourable conditions for keeping pets are preoccupations of their owners. Devices of Evapolar company do not only create additional comfort for pets, but are also safe for their health.

Advantages:

- + does not dry the nasal mucous membrane
- + sorts out dust particles and improves air quality
- + does not contain organic substances that lead to the multiplication of pathogenic bacteria and mold

What for?

With the help of Evapolar devices, lovers of caravanning and camping can now create favourable conditions in their motorhomes and tents.

Advantages:

- + consumes only 7,5 W
- + works on any USB source
- + cools, cleans and humidifies the air
