

REXCON PORTABLE AUXILIARY BIN

The RexCon 600 Barrel Portable Auxiliary Bin offers the highest standard in quality, design, and durability in the industry today.

The Portable Auxiliary Bin is versatile and can be custom-engineered to meet your individual specifications. Hydraulic self-erect allows quick and easy setup for optimal efficiency and production.

SPECIFICATIONS & FEATURES

The bin is a single compartment enclosure with a nominal cement storage capacity of 600 Barrels | 112 Tonnes | 2,400 Cubic Feet. The unit is a trailerized main frame with a triple axle spring suspension transportation gear featuring a king pin, brakes and signal lighting. The bin features one 5" fill pipe with the option to add three additional fill pipes. The unit is pre-plumbed, pre-wired, and features an access hatch for ease of maintenance. The cement screw is a 12" direct drive screw, powered by a 40 HP motor. The bin features a NEMA motor control panel with one high and one low level indicator with a lightbox. The hydraulic system operates on a gasoline powered 3.5 HP hydraulic pac that includes two main lifting cylinders and four frame lifting cylinders for running gear removal.
