**CON-E-CO<sup>®</sup> SLP  
CENTRAL MIX PLANTS:**

***BIG PERFORMANCE  
YOU CAN TRUST.***

# CON-E-CO'S SLP CENTRAL MIX PLANTS DELIVER EVERYTHING YOU COULD WANT IN FLEXIBILITY AND PRODUCTIVITY.

The CON-E-CO® SLP Series of central mix batch plants are known for efficiency and high production. The CON-E-CO team will work hand in hand with you to engineer and build a plant that fits the needs of your operation and your site.

These plants also have the ability to incorporate a wide range of optional components for a more customized approach. Options include:

- 12- or 15-cubic yard tilting mixer
- Innovative 12-cubic yard Horizontal Reversing Mixer (HRM)
- Low profile for reduced height
- Designed to site space requirements and limitations
- Compact designs to reduce building enclosure costs
- Large, double-wall split rectangular or round silos
- CON-E-CO recirculating patented style or gravity feed cement batcher
- Aggregate bins sized for your production needs
- Available with oversized aggregate batcher for 12-yard mix design flexibility
- Central or individual dust control systems
- Mixer-charging conveyor belts from 36" to 54"
- Custom-designed maintenance access platforms
- Many other production-enhancing options available

## ***SUPPORT THAT IS SECOND TO NONE.***

When you choose a CON-E-CO tilt mixer, you also get the full resources of our exceptional dealer network and unbeatable factory support.
