

# Google Cloud Reselling Benefits

Here are a few of the many reasons why taking advantage of a Google Cloud reseller partnership with happtiq can be a massive advantage for your business:

## Same price, free additional benefits

Why should you partner with a Google Cloud Partner, you wonder? Certainly, this will only add unnecessary complexity and additional costs, right? Let us assure you that quite the opposite is the case.

If you decide to partner with us, you will pay the same price as you would by buying directly from Google and additionally qualify for the happtiq Credit System. Based on your average monthly GCP spend, you are entitled to receive so-called happtiq Credits, which you can consume for certain services at no extra cost. These include but are not limited to: Consulting, Support, Workshops, Trainings and many more.

We will work with you to identify the best fitting service package for your culture and environment.

## Flexible payments

You have custom payment requirements which Google doesn't fulfill? Talk to us and let us know how you'd imagine the process and format of your cloud payments and we will make it happen. We can help you with simplifying and combining the payment into one easy to understand receipt or if you'd like to see a separate line for each department or team so that you can easily cross charge the spendings within your organization. Focus on your daily business and let us deal with the complicated part of the game.

## Local, fast and easy support from certified Google Cloud engineers

We understand that it might be challenging to navigate through and fully understand the vast amount of services a major cloud provider offers. It can become time consuming and cumbersome to work through different levels of support tiers in order to get relevant feedback. By choosing happtiq as your designated partner, you get a trusted Google Cloud partner in your region providing local language support that helps you maneuver through any pain your business may face. Cut yourself some slack, focus on growing and leave the problem solving to us.
