Dallas, TX 75267-0212

TOGETHER

58%

Veterans die by suicide at a 58% higher rate than those who haven't served.

Suicide is a complex problem that disproportionately impacts the military community.

Military suicide has claimed more lives than we've lost in most individual major conflicts including World War I, the Vietnam War and the Global War on Terror.

Stop Soldier Suicide is the only national nonprofit focused solely on solving the issue of suicide among U.S. veterans and service members.

Our team is laser-focused on research and care that is specific to reducing veteran and service member suicide.

Our vision is a nation where veterans and service members have no greater risk for suicide than any other American.

We are laser-focused on reducing veteran and service member suicide in the military.

ROGER Wellness Service

ROGER™ Wellness Service provides confidential, suicide-specific care to veterans and service members nationwide regardless of branch, discharge status, or generation of service.

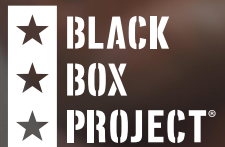

Through telehealth services, we make it easier for individuals to access support wherever they are.

By offering care at no cost and without insurance billing, we remove barriers that often stand in the way of getting help.

Our evidence-based approach ensures veterans and service members receive the compassionate, effective care they need and deserve—when it matters most.

GET CONNECTED

ROGER™ is always just a click or call away at GoRoger.org or (833) 906-3124.

A groundbreaking data initiative advancing precision identification of suicide risk.

Just as aviation's black boxes reveal the cascading factors that lead to crashes, this groundbreaking initiative seeks to understand the digital signals that can precede suicide – transforming profound loss into life-saving knowledge.

Through the extraordinary courage of suicide loss-surviving families, who choose to loan their loved one's devices for research, we are able to uncover patterns that were previously invisible to clinicians and even those closest to the individual.

Black Box Project® helps fill a critical gap that has challenged suicide research for decades: an unbiased view into the pathways that can lead to suicide, with the goal of preventing future loss through more precise risk identification.

Black Box Project® is where loss becomes legacy, data becomes hope, and innovation saves lives.
