

Paraphrase the given content

**Class Objective: I will be able to paraphrase the given content**

### **Concept A: Introduction**

Paraphrasing is expressing the meaning of something written by using different words, to achieve greater clarity. It is rewriting of a content without changing the meaning of the original text.

Sample- **The children were** starving after the match.

Paraphrase- The children were very hungry after their game.

### **Concept B: Importance of paraphrasing**

Paraphrase helps to convey the meaning of the original message clearly. It shows that one has understood the passage well enough to restate it.

- Read and understand the text.
- Restate in your own words.
- Recheck if all details are included from the original.
- Reread and repair for any grammatical errors.

### **Concept C: Steps for paraphrasing.**

- The paraphrase should provide an accurate understanding of the content.
- Understand the original text with its meaning
- Include all the main points or concepts.
- Do not copy the text, it should be in your own words.
- Change the structure of the text.
- Reorder the sentences by lengthening or shortening sentences.
- It can be the same length or shorter than the original content.
- Synonyms or simpler words can be used as required.
- We must not make any assumptions or add additional information.
- Neither should we give our own opinion.
- We must avoid flowery language or any abbreviations.

### **Concept D : Sample**

1. This winter has been the coldest in the last ten years.

1. **Introduction**

2. **Background**

3. **Method**

- 1. **Study Design**
- 2. **Participants**
- 3. **Intervention**

4. **Results**

- 1. **Primary Outcome**
- 2. **Secondary Outcome**
- 3. **Subgroup Analysis**

5. **Conclusion**

- 1. **Summary**

6. **References**

7. **Appendix**

8. **Supplementary Materials**

9. **Notes**

- 1. **Notes**
- 2. **Notes**
- 3. **Notes**

10. **References**

1. **Introduction**

2. **Background**

3. **Method**

- 1. **Study Design**
- 2. **Study Population**
- 3. **Study Variables**

4. **Results**

- 1. **Descriptive Statistics**
- 2. **Statistical Analysis**
- 3. **Interpretation of Results**

5. **Conclusion**

- 1. **Summary of Findings**

6. **Discussion**

7. **References**

8. **Appendix**

9. **Notes**

- 1. **Notes on the Study**
- 2. **Notes on the Data**
- 3. **Notes on the Analysis**

10. **Index**

1. **Introduction**

This document describes the system architecture and components.

2. **System Architecture**

- 1. **System Overview**
- 2. **System Components**
- 3. **System Flow**

3. **System Components**

- 1. **System Overview**  
The system is designed to provide a secure and efficient way to manage data.
- 2. **System Components**  
The system consists of several components, including a database, a web interface, and a security module.
- 3. **System Flow**  
The system flow is as follows: User login -> Data retrieval -> Data processing -> Data storage.

4. **System Flow**

- 1. **System Overview**  
The system is designed to provide a secure and efficient way to manage data.

5. **System Components**

6. **System Flow**

7. **System Architecture**

8. **System Components**

- 1. **System Overview**
- 2. **System Components**
- 3. **System Flow**

9. **System Flow**

1. **Introduction**

2. **Background**

3. **Method**

1. **Study Design**
2. **Participants**
3. **Intervention**

4. **Results**

1. **Primary Outcome**
2. **Secondary Outcome**
3. **Subgroup Analysis**

5. **Conclusion**

1. **Summary**

6. **References**

7. **Appendix**

8. **Supplementary Materials**

9. **Notes**

1. **Notes**
2. **Notes**
3. **Notes**

10. **References**
