#### Review 4

Class Objectives: Let us do the revision of the lessons we learnt so far!

Concept A: Reading practice Read this passage

#### Earth

Earth is a planet that revolves around the sun in our solar system. It is the only known planet in the universe that supports life. No living organism can survive on other planets Earth is also known as the Blue Planet as it looks blue from space because of seas. More than 70% of the earth's surface is covered with water. Most of the water is in the oceans. Around 30% of Earth's surface is land. All the humans, trees, and land animals live in this 30% area. Earth has three layers — Crust, Mantle and Core. The core is the inner-most layer of the earth while mental is the middle one. Crust is the topmost layer. The core is the hottest of all as it keeps burning because of lava all the time. Earth has four main seasons — Summer, Winter, Autumn, and Spring. Summer is hot while Winter is cold. In autumn, most of the trees shed their leaves. In spring, new leaves appear on the trees. Earth has an atmosphere which consists of Nitrogen, Oxygen and other gases. This atmosphere acts like a blanket and keeps harmful radiations of the sun away from us. There are hundreds of important elements in the inner surface of the earth. e.g. Gold, Silver, Iron, Diamond, Petroleum, etc. We should always try to save the earth as it is our motherland.

# पृथ्वी

पृथ्वी एक ऐसा ग्रह है जो हमारे सौर मंडल में सूर्य के चारों ओर घूमता है।यह ब्रह्मांड का एकमात्र ज्ञात ग्रह है जो जीवन का समर्थन करता है। कोई भी जीवित जीव अन्य ग्रहों पर जीवित नहीं रह सकता है। पृथ्वी को नीले ग्रह के रूप में भी जाना जाता है क्योंकि यह समुद्र की वजह से अंतरिक्ष से नीला दिखता है।पृथ्वी की सतह का 70% से अधिक हिस्सा पानी से ढका हुआ है। अधिकांश पानी महासागरों में है।पृथ्वी की सतह का लगभग 30% भाग भूमि है। इस 30% क्षेत्र में सभी मनुष्य, पेड़ और जानवर रहते हैं।पृथ्वी की तीन परतें हैं - क्रस्ट, मेंटल और कोर। कोर पृथ्वी की सबसे भीतरी परत है, जबिक मानसिक मध्य है। क्रस्ट सबसे ऊपरी परत है। कोर सबसे गर्म है क्योंकि यह हर समय लावा के कारण जलती रहती है।पृथ्वी के चार मुख्य मौसम हैं - ग्रीष्म, सर्दी, शरद और वसंत। ग्रीष्म ऋतु गर्म होती है जबिक शीत ऋतु ठंडी होती है। शरद ऋतु में, अधिकांश पेड़ अपने पत्ते बहा देते हैं। वसंत में, पेड़ों पर नए पत्ते दिखाई देते हैं।पृथ्वी में एक वायुमंडल है जिसमें नाइट्रोजन, ऑक्सीजन और अन्य गैसें हैं। यह वातावरण एक कंबल की तरह काम करता है और सूर्य की हानिकारक विकिरणों को हमसे दूर रखता है।पृथ्वी की आंतरिक सतह में सैकड़ों महत्वपूर्ण तत्व हैं। जैसे सोना, चांदी, लोहा, हीरा, पेट्रोलियम, आदि।हमें हमेशा पृथ्वी को बचाने की कोशिश करनी चाहिए क्योंकि यह हमारी मातृभूमि है।
