

Describe things that can be recycled

Conversation      Advanced      Describe things that can be recycled

**Class objective: I am able to understand the things that can be recycled**

### **Concept A: Introduction**

Recycling involves processing waste materials into new useful products. The process involves collecting, segregating, processing and manufacturing the recycled product.

### **Concept B - Vocabulary**

- Reduce- We must reduce the amount of waste produced by buying only what we need and not waste resources.,
- Recycle- Before throwing something away, we must think about whether all or part of it could be recycled. It means putting a product to a new use instead of throwing it away.
- Reuse- We must use the item multiple times before we decide to replace it.
- Conservation- Conservation is defined as the judicious and wise use of natural resources without wasting them and replacing them whenever possible.
- Waste- any substance which is discarded after primary use,
- Composting- natural process of recycling organic matter, such as leaves and food scraps, into a valuable fertilizer.
- Incineration- the destruction of waste material, by burning.
- Landfill- it is a site for the disposal of waste materials

### **Concept C: List of things that can be recycled**

- Glass bottles and jars.
- Plastic products.
- Tin, aluminum, and steel cans.
- Paper including newspapers, magazines
- Cardboard
- Food waste
