

Chinese numbers

Class objective:

I am able to count in Chinese from 1-99.

Important points to know-

- How to count till 1-10
- How to make bigger numbers

Concept A: How to count till 10- below is how to pronounce the numbers-

1. 一Yī
2. 二Èr
3. 三Sān
4. 四Sì
5. 五Wǔ
6. 六Liù

1. **Introduction**

This document describes the system architecture and components.

2. **System Architecture**

- 1. **System Overview**
- 2. **System Components**
- 3. **System Flow**

3. **System Components**

- 1. **System Overview**
The system is designed to provide a comprehensive solution for managing data and resources. It consists of several key components that work together to ensure efficient operation.
- 2. **System Components**
The system is composed of the following main components:
 - Database Layer**: Responsible for storing and retrieving data.
 - Application Layer**: Handles the business logic and user interactions.
 - Presentation Layer**: Provides the user interface for the system.
- 3. **System Flow**
The system flow describes the sequence of operations and data flow between the components.

4. **System Flow**

- 1. **System Overview**
The system flow illustrates the process from user input to data storage and retrieval.

5. **Conclusion**

This document provides a detailed overview of the system architecture.

The system is designed to be scalable and flexible, allowing for future enhancements.

6. **Appendix**

- 1. **System Overview**
- 2. **System Components**
- 3. **System Flow**

7. **References**
