3. **System Components**

- 1. **System Overview**
The system is designed to provide a comprehensive solution for managing data and resources. It consists of several key components that work together to ensure efficient operation.
- 2. **System Components**
The system is composed of the following main components:
 - **Database Layer**: Stores and manages the data.
 - **Application Layer**: Processes the data and provides the user interface.
 - **Interface Layer**: Connects the application to the user.
- 3. **System Flow**
The system flow is as follows:
 - **User Interaction**: The user interacts with the system through the interface.
 - **Data Processing**: The application layer processes the data.
 - **Data Storage**: The data is stored in the database.

4. **System Flow**

- 1. **System Overview**
The system flow is as follows:
 - **User Interaction**: The user interacts with the system through the interface.
 - **Data Processing**: The application layer processes the data.
 - **Data Storage**: The data is stored in the database.
