

### Advanced 3 -Sequencing events

**Class Objective:** I am able to sequence the events in the story and summarise it in my own words.

**Practice A: Steps to sequence:**

**Write the number 1-5 to sequence the story.**

**Write the number to sequence the actions.**

1. **Introduction**

This document describes the system architecture and the components of the system.

2. **System Architecture**

- 1. **System Overview**
- 2. **System Components**
- 3. **System Flow**

3. **System Components**

- 1. **System Overview**  
The system is designed to provide a secure and reliable environment for the user. It consists of several components that work together to ensure the system's functionality and security.
- 2. **System Components**  
The system is composed of several key components, including the user interface, the data storage, and the processing unit. Each component plays a critical role in the overall system performance.
- 3. **System Flow**  
The system flow is designed to be efficient and easy to use. It follows a clear path from the user's input to the final output, ensuring that the user's needs are met at every step.

4. **System Flow**

- 1. **System Overview**  
The system flow is designed to be efficient and easy to use. It follows a clear path from the user's input to the final output, ensuring that the user's needs are met at every step.
