1. **Introduction**

This document describes the system architecture and components.

2. **System Architecture**

3. **System Components**

- 1. **System Overview**  
The system is designed to provide a comprehensive solution for managing data and resources. It consists of several key components that work together to ensure efficient operation.
- 2. **System Components**  
The system is composed of the following main components:
  - Database Layer**: Stores and manages the data.
  - Application Layer**: Processes the data and provides the user interface.
  - Presentation Layer**: Displays the data to the user.
- 3. **System Flow**  
The system flow is as follows:
  - User input is received by the presentation layer.
  - The data is then processed by the application layer.
  - The results are stored in the database layer.

4. **System Flow**

- 1. **System Overview**  
The system flow is as follows:
  - User input is received by the presentation layer.
  - The data is then processed by the application layer.
  - The results are stored in the database layer.
