Advanced 1- Discussion on the use of Google Translators

Discussion on the use of Google Translators

Class Objective : I will be able to discuss the above topic.

Google offers a free translator service known as Google translator that instantly translates words, phrases, and web pages between English and over 100 other languages.

Concept A: Vocabulary needed to discuss the topic

1. Consistency — It is how often a term or phrase is rendered the same way into the target language by using the translation system.
2. Context — the information that the text wants to provide.
3. Automatic Translation — It is translation done through machine
4. Interpretation —It is where any oral spoken or written words from one language to another, or the output that results from this process.
5. Literal Translation — Translation that closely follows the phrasing, order as well as sentence construction of the source text.
6. Machine Translation— Translation carried out exclusively by a machine

Concept B: Advantages of using Google translators

- It can translate a variety of texts and media such as words, phrases and webpages.
- It also has an Android and iOS app which serves as a portable personal interpreter.
- It can translate written words, handwritten words to any language in their database.
- It can translate an entire document.
- It can even translate spoken words into the desired foreign language.
- It offers image translation, where it picks up the text from the image and translates into the language as required by the user.
- It can also detect language, if the user is not sure of the text.
- There are many additional languages which they are adding to their database.
- It easily and correctly translates when text is well-structured and is written using formal language, with simple sentences, relating to formal topics.
- It acts as a versatile tool for on-the-spot translations.

Concept C: Constraints of Google translators

Date: February 3 | 4:00-5:00pm

Present: Brandon (driver), Jasmine (navigator), Collin (reviewer)

Agenda

1. Discuss milestone goals
2. Implement testing
3. Discuss deliverables

Minutes

1. We confirmed the milestone requirements on the google doc. Focus this development on testing, unit testing, and basic deliverables.
2. Brandon, Jasmine, and Collin did pair programming and navigated who was the main editor for the implementation of testing. We used a combination screen and in-person coding this time.
3. We all learned about how we could implement deliverables and their outlines.

Next Action Items

1. Prepare for the coding tomorrow by reviewing calls about testing and also to implement/log and compiling.

Meeting #3

Date: February 4 | 8:00-9:00pm

Present: Brandon (driver), Jasmine (navigator), Collin (reviewer)

Agenda

1. Complete testing and unit compiling
2. Create deliverables
3. Milestone report

Minutes
