

## Particles(으)로

### Class objective:

I will be able to understand the particles (으)로

### Introduction

- (으)로 (-eu)ro) is a particle that indicates selection.

It serves the same purpose as the object marker in many cases, but since this particle has the original meaning “toward” or “to,” which represent directions, even when it is used as the selection particle, it has a nuance of “leaning toward a choice.”

Therefore, (으)로 has a narrower meaning than -을/를 and cannot always replace -을/를.

(으)로 is used and translated like the object markers -을 and -를, but it specifies the characteristics of the mentioned topic and shows selection.

### Concept A: Formation
