

PRONOUNS

Class Objective:

I am able to identify, list out and use pronouns in sentences in Sanskrit.

Concept A: What is a pronoun?

Pronouns are words that are used instead of nouns. We call them 'Sarvanaama' in Sanskrit.

Examples:

I	-	Aham
You	-	Tvam
We	-	Vayam

Concept B: Set 1 - Pronouns

I	-	aham
You	-	tvam/bhavaan
He	-	saha/bhavatah
She	-	saa/bhavatyaaha
It	-	tat/etat
We	-	vayam
They	-	ete(m)/etaaha(f)/etaani(N)
You all	-	yuyam

In sanskrit apart from singular and plural, we also have dual (two).

Singular will be single

Dual will be two

Plural will be more than two

Dual:

We both:	aavam
You both:	yuvaam
They both:	etou(M)/ete (N and F)

Examples:

He reads a book

Saha pustakam pathati

She reads a book

Saa pustakam pathati

It goes.

Tat gacchati

I read book

Aham pustakam pathaami

1. **Introduction**

This document describes the system architecture and components.

2. **System Architecture**

- 1. **System Overview**
- 2. **System Components**
- 3. **System Flow**

3. **System Components**

- 1. **System Overview**
The system is designed to provide a comprehensive solution for managing data and resources. It consists of several key components that work together to ensure efficient operation.
- 2. **System Components**
The system is composed of the following main components:
 - Database Layer**: Stores and manages the data.
 - Application Layer**: Processes the data and provides the user interface.
 - Presentation Layer**: Displays the data to the user.
- 3. **System Flow**
The system flow is as follows:
 - User input is received by the presentation layer.
 - The data is then processed by the application layer.
 - The results are stored in the database layer.

4. **System Flow**

- 1. **System Overview**
The system flow is as follows:
 - User input is received by the presentation layer.
 - The data is then processed by the application layer.
 - The results are stored in the database layer.

5. **Conclusion**

This document provides a detailed overview of the system.

The system is designed to provide a comprehensive solution for managing data and resources.
