1. **Introduction**

This document describes the system architecture and the components of the system.

2. **System Architecture**

- 1. **System Overview**
- 2. **System Components**
- 3. **System Flow**

3. **System Components**

- 1. **System Overview**
The system is designed to provide a secure and reliable environment for the storage and retrieval of data. It consists of several components, including a database, a web application, and a user interface.
- 2. **System Components**
The system is composed of the following components:
 - Database: A relational database that stores the data.
 - Web Application: A web-based application that provides the interface for the user.
 - User Interface: A graphical user interface that allows the user to interact with the system.
- 3. **System Flow**
The system flow is as follows:
 - The user enters data into the system.
 - The data is stored in the database.
 - The user retrieves data from the database.
 - The data is displayed on the user interface.
