

Advanced 1- Interview

Class Objective: I will be able to understand how to interview a person.

Concept: Interview with Bill Gates:

Ques. 1: Hello Bill Gates. What is your idea of success?

Bill Gates: Warren Buffett has always said the measure is whether the people close to you are happy and love you. It is also nice to feel like you made a difference – inventing something or raising kids or helping people in need.

Ques. 2: What do you personally find as your greatest achievement?

Bill Gates: Although the Foundation work is super promising and will be the biggest thing over the decades ahead I still think the chance to be part of the software revolution empowering people was the biggest thing I have gotten to do.

Right now I am very focused on making sure we successfully eradicate polio – that will be amazing if we do it – as good as shipping even the best software product.

Ques. 3: If you could give 19-year-old Bill Gates some advice, what would it be?

Bill Gates: I would explain that smartness is not single dimensional and not quite as important as I thought it was back then. I would say you might explore the developing world before you get into your forties. I wasn't very good socially back then, but I am not sure there is advice that would fix that – maybe I had to be awkward and just grow up....

Ques. 4: Do you ever disguise yourself and just walk around incognito?

Bill Gates: I sometimes wear a hat. For example when I did college tours with my son I wanted the focus to be totally on him. A lot less people recognize me when I have a hat on or else they realize I am trying to be incognito.

Mostly when people do recognize me they are super nice, so I don't feel it is a burden to be noticed most of the time.

1. **Introduction**

2. **Background**

3. **Method**

- 1. **Study Design**
- 2. **Participants**
- 3. **Intervention**

4. **Results**

- 1. **Primary Outcome**
