- 2. **System Components**
- 3. **System Flow**

3. **System Components**

- 1. **System Overview**  
The system is designed to provide a comprehensive solution for managing data and resources. It consists of several key components that work together to ensure efficient operation.
- 2. **System Components**  
The system is composed of the following main components:
  - **Database Layer**: Stores and manages the data.
  - **Application Layer**: Processes the data and provides the user interface.
  - **Presentation Layer**: The user interface for the system.
- 3. **System Flow**  
The system flow is as follows:
  - **User Interaction**: The user interacts with the system through the presentation layer.
  - **Data Processing**: The application layer processes the data and generates results.
  - **Data Storage**: The database layer stores the data and provides access to it.

4. **System Flow**

- 1. **System Overview**  
The system flow is as follows:
  - **User Interaction**: The user interacts with the system through the presentation layer.
  - **Data Processing**: The application layer processes the data and generates results.
  - **Data Storage**: The database layer stores the data and provides access to it.
