

## Present subjunctive (regular verbs)

**Class objective:** To learn the conjugations of 'presente de subjuntivo' of regular verbs and able to use them in making sentences in Spanish.

**Concept A:** Introduction.

⇒ El presente de subjuntivo is the present tense of the subjunctive mood. It is used after certain conjunctions, expressions, and verbs to indicate some sort of subjectivity, such as a wish, doubt, fear, necessity, possibility, as well as to express a judgment of personal value or obligation.

⇒ The present subjunctive (presente subjuntivo) can refer to the future as well as the present. It is used in both simple sentences and dependent clauses to indicate probability, uncertainty, wishes, doubt, personal opinions and feelings.

⇒ The subjunctive is not a tense; rather, it is a mood. Tense refers to when an action takes place (past, present, future), while mood merely reflects how the speaker feels about the action. The subjunctive mood is rarely used in English, but it is widely used in Spanish.

⇒ Presente de Subjuntivo Verbos Regulares Irregulares: El Presente de subjuntivo habla de una acción actual o futura. El subjuntivo es un modo, no es un tiempo.

*(Present Subjunctive Irregular Regular Verbs: The Present Subjunctive speaks of a current or future action. The subjunctive is a mood, it is not a tense.)*

Es el modo

- de la subjetividad (no realidad - indicativo)
- de la irrealidad
- de la duda
- de la hipótesis
- del mandato
- de los sentimientos

Casi nunca va aislado - normalmente la frase de subjuntivo depende de un verbo principal en indicativo. Sin embargo, existen oraciones con un solo verbo que debe o puede ir en Subjuntivo (oraciones independientes).

*(It is almost never isolated - usually the subjunctive phrase depends on a main verb in the indicative. However, there are sentences with a single verb that must or can go in the Subjunctive (independent sentences).)*
