

Revision of Conditional Sentences

Class objective: To be able to revise the use of “IF” in conditional sentences.

Concept A: A conditional sentence contains an independent clause and a dependent clause that almost always begins with “if.” A conditional sentence is only a conditional sentence if it has both of these parts.

There are four types of conditional sentences

- Zero conditional.
- First conditional.
- Second conditional.
- Third conditional.

Concept B: Types Of Conditionals.

Zero Conditional

A zero conditional sentence is a sentence that expresses a fact or simple implication. The dependent clause of the zero conditional begins with “if” or “when.” The independent clause of the zero conditional begins with the simple present verb tense or the imperative verb tense.

Zero conditional statements express conditions that are always true and the conclusions of which can be drawn from their premises.

Examples

- If it rains, things get wet.
- If you stare at the sun, your eyes damage.
- If you touch a flame, you burn yourself.

First Conditional

A first conditional sentence is a sentence that expresses an idea that might happen at some point in the future. It is something that is possible, but its certainty is unknown because it depends on another event.

The dependent clause of the first conditional begins with “if” and uses the simple present tense. The independent clause of the first conditional uses “will” plus the base form of a verb.

“If”+ Simple Present Tense, Simple Future Tense in the main clause

Examples

- If you *work* hard, you *will succeed*.
- If it *rains*, we *shall postpone* our picnic

Second Conditional

1. **Introduction**

This document describes the structure and content of the course.

2. **Objectives**

- 1. Understand the basic concepts of the course.
- 2. Apply the concepts to solve problems.
- 3. Develop the ability to work in a team.

3. **Structure**

- 1. The course is divided into three main parts: theory, practice, and assessment.
- 2. The theory part covers the basic concepts and principles of the course.
- 3. The practice part involves solving problems and working in a team.
- 4. The assessment part consists of a final exam and a project.

4. **Assessment**

- 1. The final exam will be held at the end of the course.

5. **Conclusion**

This document provides a brief overview of the course.

For more information, please contact the course coordinator.

6. **References**

- 1. [Reference 1]
- 2. [Reference 2]
- 3. [Reference 3]

7. **Appendix**

1. **Introduction**

This document describes the system architecture and the components of the system.

2. **System Architecture**

- 1. **System Overview**
- 2. **System Components**
- 3. **System Flow**

3. **System Components**

- 1. **System Overview**
The system is designed to provide a secure and reliable environment for the user. It consists of several components that work together to ensure the system's functionality and security.
- 2. **System Components**
The system is composed of several key components, including the user interface, the data storage, and the processing unit. Each component plays a crucial role in the overall system's performance.
- 3. **System Flow**
The system flow is designed to be efficient and easy to use. It follows a clear path from the user's input to the final output, ensuring that the user's needs are met at every step.

4. **System Flow**

- 1. **System Overview**
The system flow is designed to be efficient and easy to use. It follows a clear path from the user's input to the final output, ensuring that the user's needs are met at every step.

5. **Conclusion**

This document provides a comprehensive overview of the system architecture and its components.

The system is designed to be secure, reliable, and easy to use, ensuring that the user's needs are met at every step.
