

Talking about the extinction of animals

Class objective: I will be able to talk about the extinction of animals in Kannada.

Concept A: Extinction of animals

Nowadays, many animals have disappeared from the earth whether by natural reasons or human's hands , particularly the extinct animals which we need to pay more attention to protect them from vanishing. In fact, I disagree with the idea that animals have been created to serve human beings so that we have the right to do whatever we want to them. I strongly support the claim that extinct species will only be saved if the public has changed its behaviors such as destroying lands and hunting.

Destroying lands plays an important factor which threatens the existence of animals. As an excuse to expand the economy and investment, many people start to devastate forests in order to build buildings, flats, factories and farms. Accordingly, lands shrink and animals become exposed to the anger of nature without shelters. Furthermore, if people do not take animals home, they spoil their lands by producing the factories garbage, dirt and poisons. As a result that led at the end to a massacre of animals.

Besides, Land detriment, haunting is another element which helps animals to disappear. Hunters hunt animals to sell their valuable parts which are considered very expensive. For instance, in Africa, hunters exert great efforts to track down rhinoceros to gain its costly horns which people use to make daggers that cost from 500YR to 2millions YR. Also, Ivory trade aids to reduce the number of African elephants to 400,000 the end of century.

In summary, we have to stop demolish forests, which are the homes of animals, and hunting animals to save endangered species then keep the balance in the earth. We should not forget that we still need them in our meals. In my opinion, protecting those animals is not person's duty but it is of all human being's accountability.

ಇತ್ತೀಚಿನ ದಿನಗಳಲ್ಲಿ, ಅನೇಕ ಪ್ರಾಣಿಗಳು ಭೂಮಿಯಿಂದ ಕಣ್ಮರೆಯಾಗಿವೆ ನೈಸರ್ಗಿಕ ಕಾರಣಗಳಿಂದ ಅಥವಾ ಮನುಷ್ಯನ ಕೈಗಳಿಂದ ಅದರಲ್ಲೂ ವಿಶೇಷವಾಗಿ ಅಳಿವಿನಂಚಿನಲ್ಲಿರುವ ಪ್ರಾಣಿಗಳು ಅವುಗಳನ್ನು ಕಣ್ಮರೆಯಾಗದಂತೆ ರಕ್ಷಿಸಲು ನಾವು ಹೆಚ್ಚು ಗಮನ ಹರಿಸಬೇಕಾಗಿದೆ. ವಾಸ್ತವವಾಗಿ, ಮಾನವನ ಸೇವೆ ಮಾಡಲು ಪ್ರಾಣಿಗಳನ್ನು ಸೃಷ್ಟಿಸಲಾಗಿದೆ ಎಂಬ ಕಲ್ಪನೆಯನ್ನು ನಾನು ಒಪ್ಪುವುದಿಲ್ಲ, ಇದರಿಂದ ನಾವು ಅವರಿಗೆ ಏನು ಬೇಕಾದರೂ ಮಾಡುವ ಹಕ್ಕಿದೆ. ಭೂಮಿಯನ್ನು ನಾಶಪಡಿಸುವುದು ಮತ್ತು ಬೇಟೆಯಾಡುವುದು ಮುಂತಾದ ನಡವಳಿಕೆಗಳನ್ನು ಸಾರ್ವಜನಿಕರು ಬದಲಾಯಿಸಿಕೊಂಡರೆ ಮಾತ್ರ ಅಳಿವಿನಂಚಿನಲ್ಲಿರುವ ಜಾತಿಗಳನ್ನು ಉಳಿಸಲಾಗುತ್ತದೆ ಎಂಬ ಹೇಳಿಕೆಯನ್ನು ನಾನು ಬಲವಾಗಿ ಬೆಂಬಲಿಸುತ್ತೇನೆ.

1. **Introduction**

This document describes the system architecture and components.

2. **System Architecture**

- 1. **System Overview**
- 2. **System Components**
- 3. **System Flow**

3. **System Components**

- 1. **System Overview**
The system is designed to provide a comprehensive solution for managing data and resources. It consists of several key components that work together to ensure efficient operation.
- 2. **System Components**
The system is composed of the following main components:
 - Database Layer**: Stores and manages the data.
 - Application Layer**: Processes the data and provides the user interface.
 - Presentation Layer**: Displays the data to the user.
- 3. **System Flow**
The system flow is as follows:
 - User input is received by the presentation layer.
 - The data is then processed by the application layer.
 - The results are stored in the database layer.

4. **System Flow**

- 1. **System Overview**
The system flow is as follows:
 - User input is received by the presentation layer.
 - The data is then processed by the application layer.
 - The results are stored in the database layer.

5. **Conclusion**

This document provides a detailed overview of the system architecture.

The system is designed to be scalable and flexible, allowing for future growth and changes.
