

Commands and Requests

Class Objective:

I will be able to learn and use commands and requests in Gujarati.

Concept A: Vocabulary

English	Gujarati
Command	Aadesh- આદેશ
Request	Vinanti- વિનંતી
Should	Joiae- જોઈએ
Don't	Nahi- નહીં
Please	Maherbani/Krupa krine- મહેરબાની /કૃપા કરીને
Order	Order- ઓર્ડર

In Gujarati, the imperative form of a verb is not only used to issue commands but also regularly used to make requests.

This is done in Gujarati in two ways:

- a) an impolite and/or intimate/informal way and
- b) a polite or formal way.

Informal imperative form is used only to address young persons, servants, children and also used among close friends.

Concept B: Commands/Informal or impolite imperative sentences

English	Gujarati
See that.	Te juo- તે જુઓ.
Sing a song.	Geet Gao- ગીત ગાઓ.
Eat this.	Aa khao- આ ખાઓ.
Drink the juice.	Juice pio- જ્યુસ પીઓ.

1. **Introduction**

This document describes the system architecture and components.

2. **System Architecture**

- 1. **System Overview**
- 2. **System Components**
- 3. **System Flow**

3. **System Components**

- 1. **System Overview**
The system is designed to provide a comprehensive solution for managing data and resources. It consists of several key components that work together to ensure efficient operation.
- 2. **System Components**
The system is composed of the following main components:
 - Database Layer**: Stores and manages the data.
 - Application Layer**: Processes the data and provides the user interface.
 - Presentation Layer**: Displays the data to the user.
- 3. **System Flow**
The system flow is as follows:
 - User input is received by the presentation layer.
 - The data is then processed by the application layer.
 - The results are stored in the database layer.

4. **System Flow**

- 1. **System Overview**
The system flow is as follows:
 - User input is received by the presentation layer.
 - The data is then processed by the application layer.
 - The results are stored in the database layer.

5. **Conclusion**

This document provides a detailed overview of the system architecture.

The system is designed to be scalable and flexible, allowing for future growth and changes.
