

Advanced 2- Finland's Education System: Pros and Cons

Class objective: I will be able to understand and can participate in the discussion on this topic.

Concept A: Vocabulary:

Autonomous: Self governing
While the very young baby is highly dependent on its caretakers for all its needs, an older baby tends to be more autonomous because it can walk and speak.
Cosmopolitan: Belonging to the whole world
New York, London, Los Angeles are truly cosmopolitan cities, with people from across the globe inhabiting them.
Discordant: Not harmonious, conflicting
The proposal enjoys enormous popularity and backing by most parties but for some discordant voices that are not interested in it.
Emissary: Agent
Instead of coming himself, the Ambassador sent his emissary to discuss the bi-lateral issues.
Inculcate: To teach by repetition
The qualities of patriotism, courage and honesty were inculcated in Shivaaji's mind by his mother Jijabai who used to tell him stories of great warriors and patriots.
Merciful: Disposed to pity and forgive
The judge mercifully let him off the crime.
Perennial: Something long-lasting
A perennial problem which this hospital has been facing since its inception, has been the shortage of suitably qualified doctors.
Peripheral: External
Only peripheral vision is impaired in cases of optical periphraisis, leaving vision in the central region of the eye absolutely intact.
Propriety: Fitness, correct conduct
The propriety of the lower court's order can be challenged only in the high court, which will decide whether the order passed by the lower court was legally genuine or otherwise.

10. **Appendix**

1. **Introduction**

This document describes the system architecture and components.

2. **System Architecture**

- 1. **System Overview**
- 2. **System Components**
- 3. **System Flow**

3. **System Components**

- 1. **System Overview**
The system is designed to provide a comprehensive solution for managing data and resources. It consists of several key components that work together to ensure efficient operation.
- 2. **System Components**
The system is composed of the following main components:
 - Database Layer:** Responsible for storing and retrieving data.
 - Application Layer:** Handles the business logic and user interactions.
 - Presentation Layer:** Provides the user interface for the system.
- 3. **System Flow**
The system flow is as follows:
 - User interacts with the presentation layer.
 - Data is processed by the application layer.
 - Data is stored/retrieved from the database layer.

4. **System Flow**

- 1. **System Overview**
The system flow is as follows:
 - User interacts with the presentation layer.
 - Data is processed by the application layer.
 - Data is stored/retrieved from the database layer.

5. **Conclusion**

This document provides a detailed overview of the system architecture.

The system is designed to be scalable and flexible, allowing for future enhancements.
