1. **Introduction**

This document describes the system architecture and components.

2. **System Architecture**

- 1. **System Overview**
- 2. **System Components**
- 3. **System Flow**

3. **System Components**

- 1. **System Overview**  
The system is designed to provide a comprehensive solution for managing data and resources. It consists of several key components that work together to ensure efficient operation.
- 2. **System Components**  
The system is composed of the following main components:
  - Database Layer**: Stores and manages the data used by the system.
  - Application Layer**: Contains the business logic and processing routines.
  - User Interface Layer**: Provides the means for users to interact with the system.
- 3. **System Flow**  
The system flow describes the sequence of operations and data flow between the various components.

4. **System Flow**

- 1. **System Overview**  
The system flowchart illustrates the process flow from data input to final output, highlighting the roles of each component.

5. **Conclusion**

This document provides a detailed overview of the system architecture.

The system is designed to be scalable and flexible, allowing for future enhancements.
