Describe some useful websites that you know

Class objective: I am able to understand and describe useful websites

Concept A: Introduction:

A website is a collection of web pages and related content that shares a common domain name and is published.
Few top websites used by people worldwide are wikipedia.org, google.com, yahoo.com, amazon.com etc.
Anyone can create a website. It can be by an individual, group, business or organization to serve a variety of purposes.

Concept B - Vocabulary:

- Search Engine- It is a system that is designed to carry out web searches. Eg Google.
- Internet- the network that connects computers all over the world.
- World Wide Web- www is a collection of webpages found on network of computer
- Webpage- It is a specific collection of information provided by a website for the search.
- URL- address of website
- Traffic- number of people visiting the website.

Concept C: Names of some famous websites:

- Facebook - this is currently the largest social networking site. We can create a profile, update information, add images, send friend requests, and accept requests from other users. It also has features such as status update, photo tagging and sharing, and more.
- Instagram- This is yet another website that is useful to share status and make friends. It provides loads of filters that can be used to share photos and events.
- Twitter- This is mostly used by celebrities and is a great site to share short news, current happenings or thoughts known as tweets.
- LinkedIn- This is a site which is normally used by professionals and corporates. Employees update their data on the website. In case anyone is interested in changing jobs, this is an ideal website.
- WhatsApp- This instant messaging app is available in almost every phone user across the world, and they are constantly hooked onto it 24/7. It also

Date: February 3 | 4:00-5:00pm

Present: Brandon (driver), Jasmine (navigator), Collin (reviewer)

Agenda

1. Discuss milestone goals
2. Implement testing
3. Discuss deliverables

Minutes

1. We confirmed the milestone requirements on the google doc. Focus this development on testing, unit testing, and basic deliverables.
2. Brandon, Jasmine, and Collin did pair programming and navigated who was the main editor for the implementation of testing. We used a combination screen and in-person coding this time.
3. We all learned about how we could implement deliverables and their outlines.

Next Action Items

1. Prepare for the coding tomorrow by reviewing calls about testing and also to implement/log and compiling.

Meeting #3

Date: February 4 | 8:00-9:00pm

Present: Brandon (driver), Jasmine (navigator), Collin (reviewer)

Agenda

1. Complete testing and unit compiling
2. Create deliverables
3. Milestone report

Minutes

Date: February 3 | 4:00-5:00pm

Present: Brandon (driver), Jasmine (navigator), Collin (reviewer)

Agenda

1. Discuss milestone goals
