

SunRADON

OneRADON

Software Radon Professionals Trust

OneRADON is a comprehensive all-in-one radon test, analysis, and reporting software designed by SunRADON exclusively for Radon professionals.

The *OneRADON* software suite includes mobile, desktop, and web applications that work seamlessly together to save your business time and improve operational efficiency. *OneRADON* delivers National and State standards compliance, as well as end-to-end device management, including device surveillance, calibration or service management, and CRM quality control.

Stress-free report generation, compliance, flexibility, and ease-of-use:

- Seamless integration across Mobile, Desktop, and Cloud applications
- On the spot, customized report generation from your phone or office
- Preconfigured ANSI/AARST compliant reporting and CRM quality control (duplicates)
- Never lose any data with smart mobile-to-cloud data synchronization and data backup
- Manage your calibration and repairs via the integrated cloud RMA portal
- Integrated SunLAB Laboratory Services – submit and receive your report on-the-go
- Mobile connectivity via Bluetooth (All XP models) or Cellular (XP+Cellular model)

Key Benefits and Features

Seamless Integration

- SunRADON Models XP optimized
- Supports legacy products Models 1030, 1028, 1027
- Smart synchronization between Mobile, Cellular, and Cloud – never lose data or reports
- Generate same advanced, customized, and compliant reports on mobile or cloud

Customized Inspection Reports

- ANSI/AARST MAH compliant reporting options
- Generate single test reports or merge 2 tests for secondary foundation
- Add pictures, checklists, risk information, and property details as needed
- Generate PDF reports, invoices, and send directly to clients from within the apps

Fully Automated CRM Quality Control

- Never worry about compliance and audit
- Get notified when duplicates or calibrations are due
- Pass/fail of QC with smart thresholds and control charts
- Generate printable QC reports per serial number on demand
