

Pixel 10 Pro XL

Repair manual

Version 1.1, August 2025

Google recommends that you seek professional assistance for all device repairs.

Self service repair isn't recommended unless you are an adult with the technical expertise to safely repair electronic devices. If you choose to perform self repair, you agree to assume the risk associated with such repair.

Use caution if you engage in repair.

When you open or repair your device, be careful of electric shock, device damage, fire and personal injury risks, and other hazards. Before you service the product, read the full set of [precautions](#) in this document.

Welcome!

We are here to help.

At Google, we innovate, design, and build to create helpful and sustainable products. Product longevity is important to us and repairability is part of that. Repair enables our products to stay in-use and out of landfills.

If you have any questions or need support, please reach out.

support.google.com

This manual is organized into sections for easy and intuitive navigation.

Precautions

Safety is a top priority for Google. Users should work in a safe environment and have the necessary skills and training to safely complete repairs.

Repair flows

Here, we have a flow chart of the most efficient repair methods.

Disassembly

Each section contains a list (in the order of device disassembly) of prerequisite steps, tools, fixtures, and parts required to complete the repair.

Assembly

For each disassemble, we provide a guide to reassemble. This might include rework steps for certain components.

Troubleshooting and testing

To identify the source of device problems and issues, use the diagnostic steps and testing recommended in this section.

Glossary

All the terms and acronyms you need to communicate with the same language to colleagues and customers.

Change battery assembly liner picture. P23, P189</div> <div>16. Add one page for bottom speaker removal. P102</div>

Pixel 10 Pro XL repair manual

Precautions

Important: Before you begin

Be careful if you engage in repair

When you open or repair a device, be careful of electric shock, device damage, fire and personal injury risks, and other hazards.

Always perform repairs in a clean work space with good ventilation and no combustible materials.

Ensure that there are no additional screws or small parts are left in the device after assembly.

Always ensure that screws are securely fastened.

Before you service the product, read the full set of precautions in this document.

Use caution: Batteries should be carefully handled, and could be dangerous when damaged

- Fully discharge the device battery before you attempt repair.
- Never bend, dent, puncture, or use tools to pry the battery.
- Store batteries in the replacement part packaging as soon as possible after removal to prevent damage.
- If a battery begins to vent, cover it in sand or use gloves and tongs to keep the battery in a fire safe container as soon as possible.
- Take care to prevent shorting of battery terminals or damage of the battery, as it could result in fire or overheating.
- Dispose of the battery according to local regulations.

Use caution: Pixel 10 Pro XL contains a class 1 laser module

The design of the device incorporates optics and protective housing such that there's no access to a level of laser radiation above class 1 during normal use or approved servicing.

Use of controls or adjustments and performance of procedures other than those specified herein might result in hazardous radiation exposure.

.

Important: Before you begin

Use caution: part handling – glass

- Wear protective gloves and safety glasses when you handle damaged parts.
- Use protective film when you remove damaged parts.
- After removal, store the damaged part in the replacement part packaging as soon as possible to prevent injury.

Tools and fixtures

The use of Google-authorized tools and fixtures is **strongly recommended** to repair a device in a safe and effective manner.

Use caution

- We *don't* recommend that you perform repairs without the specified tools and fixtures.
- Improper use of tools and fixtures might result in injury to yourself, the user of the device or other third parties, along with damage to the product, tools, fixtures, replacement parts, or other spare parts.

Important: Before you disassemble the device

- Disconnect the device from all power sources before any disassembly.
- Make sure that the battery is fully discharged before any disassembly.
- If the phone battery shows signs of swelling, damage, or if the phone feels hot or emits a strong odor, *don't* attempt disassembly. Please reach out to Google customer support.
- Take care not to expose the phone or its components to liquids after disassembly.

Use
caution

Examples of unacceptable battery conditions that are not suitable for repair*

Pouch damage

Line protrusion

Scratch

Contamination mark

Dot protrusion

Dent

Bubbling

Imprinted line

Swelling or electrolyte leakage

These are examples of potentially dangerous battery conditions but *don't* reflect all possible dangerous conditions. Please follow the general safety guidance outlined in this document.

Screw map

These are the screws used in the Pixel 10 Pro XL:

<div>Screw</div> <div>G250-07839-04</div> <div></div>	<div>Screw</div> <div>G250-07891-04</div> <div></div>	<div>Screw</div> <div>G250-08169-03</div> <div></div>	<div>Screw</div> <div>G250-07839-03</div> <div></div>	<div>Screw</div> <div>G250-08246-05</div> <div></div>
--	--	---	--	--

 - Not hidden

 - Hidden

Screws are a single use item

Screws are a single use item and if removed from the device, they should be replaced with a new screw.

Torque Spec:
(1.5/1.8) ±0.05kgf-cm

After removal, always replace with a new screw

Each screw is critical to the safe continued operation of the phone. As the thread locking adhesive can't be reactivated, always replace it with a new screw after removal.

Touch screen calibration process

Important:

Before you boot up the device

- Nothing should touch the display. This includes protective films, cases, fingers, tape, labels, scratch covers, adhesives, and debris.
- Devices should be on a flat surface. *Don't* hold it in your hands.

After the above conditions are met, press the power button to power-on the device. *Don't* touch the device until it's fully booted into the user operating system.

Display touch calibration

After any repair that requires you to open the phone, complete the display touch calibration during first boot.

Touch function

If this process isn't followed, the touch function of the screen might not work as intended.

ESD protection

Electro Static Discharge (ESD) could damage components, so it's important to work in an ESD-safe environment during repair.

Follow these four steps to keep ESD-safe:

Stay grounded

Carry out repairs on an ESD mat, when the person who repairs the device wears a grounded ESD strap.

Avoid static buildup

Don't wear synthetic fibers such as fleeces that could generate static.

Did you know?

ESD is the sudden flow of electricity through two electrically charged objects. For example, ESD is a shock you feel when you walk on a carpet, and then touch a metal door handle.

Protective bags

Pack all ESD-sensitive parts in metalized protective bags during shipping.

Avoid touching pins

Use ESD-safe tools to handle components to avoid touching the pins.

Liquid damage indicators

Liquid Damage Indicators (LDIs) are strips that change colors when a phone has been exposed to water or other liquids.

- Exposure to liquids could lead to the device malfunctioning, such as overheating or short circuits.
- There are three LDIs on this device.
- If either indicator has turned red, the device is considered to have been exposed to liquid.

The SIM card tray slot on the enclosure is visible without disassembly of the device.

On the CLB cowling, near the charge port.

On the enclosure (CG side).

Turn the Pixel on and off

Turn the power on or off

- To turn on a device when it's powered off, press and hold the power button for a few seconds. [See where the power button is located.](#)
- To power off the phone when it's turned on:
 - To power off the phone, press and hold the power and volume up buttons for a few seconds.
 - Tap **Power off** on screen.
 - For more information, see [Google help page](#).

Tip: Before you turn on the phone, charge it. Learn how to charge.

Turn the screen off and back on

- To turn the screen on and off when the phone is turned on, press the Power button once.

Tip: On some Pixel phones, you could see the time and some other information even when the screen is off. Learn which Pixel phones and [how to turn Always show time and info off or on](#).

Restart or reboot

1. On most phones, press the phone's power button for about 30 seconds, or until the phone restarts.
2. On the screen, you might need to tap **Restart**.

Tools and fixtures

The use of Google-authorized tools and fixtures is strongly recommended to repair a device in a safe and effective manner.

Use caution

- We don't recommend that you perform repairs without the specified tools and fixtures.
- Improper use of tools and fixtures might result in injury to yourself, the user of the device or other third parties, as well as damage to the product, tools, fixtures, replacement parts, or other spare parts.

Google-approved fixtures: Pixel 10 Pro XL

Google-approved fixtures are Google tested and are strongly encouraged to ensure high quality and safe repairs.

Replacement parts

Important notice about replacement parts

- The use of Google-authorized replacement parts is strongly recommended.
- If Google-authorized replacement parts are not used then performance within product specifications can't be assured.

Use caution

Use of replacement parts other than Google-authorized replacement parts, such as aftermarket batteries, might impact device safety, reliability, and performance.

Glossary

Glossary

Acronym or term	Definition
ESD	Electro Static Discharge The sudden flow of electricity through two electrically charged objects.
IPA	Isopropyl Alcohol Used to clean components and enclosures. Comes as pads or a solution.
FPC	Flexible Printed Circuit A type of low profile and flexible printed circuit.
OLED	Organic Light-Emitting Diode A type of flat panel display with an OLED to show images.
mmWave	Millimeter Wave The radio waves used to build a 5G network, to provide fast, reliable mobile data.
Sub6	Sub-6 GHz Refers to mid- and low-frequency bands under 6 GHz.
NG	Not Good. Usually refers to a condition that is not acceptable.
SBOM	Service Bill Of Materials

Disassembly instructions

Display

The display module is connected to the chin board. Be careful with the flex when you open the device as the display module is connected to the chin board.

Use caution

Use safety gloves when you handle damaged displays as splinters during removal could cause injury.

Apply protective film to broken glass before removal.

Review all **safety precautions** before you begin work.

Prerequisites

Before you begin a repair, make sure to **power off** the device and disconnect any charging cables.

Parts

Reuse indications

Reusable without cleaning

Reusable after cleaning

Not reusable after disassembly

Display

Here's the list of parts for the display disassembly:

Display module

G949-01360-00

Display adhesive

G806-15948-01

DJ flex PSA

G806-14563-01

Display cowling

G730-09238-01

Soften the adhesive

Set the heat plate to **140°F (60°C)** and place the phone back on it for **10 minutes** to soften the adhesive.

Use caution

The heat plate is hot and could cause burns.

Use safety gloves to handle damaged displays, as they could splinter and cause injury. Apply a protective liner to broken glass before removal.

Review all **safety precautions** before you begin work.

Note

Don't heat the visor area.

Mark the ESD spudger

- Use the ESD spudger to carefully separate the **display** from the **enclosure**.
- Measure **4 mm** from the tip and mark the **ESD spudger** with a permanent marker for reference, to ensure clear visibility as adhesive widths vary.

Use caution

Avoid deep insertion that might damage the device.

Use the fixture

- Fix the suction cup on the rightmost position as shown in Fig 1.
- Position the device on the holder of the **universal disassembly fixture V3**, to ensure that the phone visor aligns with the edge of the fixture as shown in Fig 2.

Note

Remove the display front protective film to attach the suction cup.

A groove prevents accidental press of the power button.

Fig 1

USB

Place the power key inside the groove.

Fig 2

Visor that touches the edge of the fixture.

Prepare for disassembly

Before you close the lid, dampen a **dust-free cotton swab** with **IPA** and apply it in the gap between the **display** and the **enclosure** on the top side.

Separate the display

- Close the lid and lift the suction cup as shown in Fig 1.
- Slowly rotate the knob to separate the **display module** from the **enclosure**.
- Use the **ESD spudger** with **IPA** to cut the adhesive off the top side when there's a gap.
- Insert a **release liner** to prevent reattachment as shown in Fig 2.

Use caution

Use safety gloves to handle damaged displays, as they could splinter and cause injury. Apply a protective liner to broken glass before removal.

Review all **safety precautions** before you work.

Fig 1

Fig 2

Separate the display adhesive

- Insert the **spudger** into the device's **top side**.
- Remove the device from the **universal disassembly fixture V3**.
- Manually slide the edges with the proper amount of **IPA**.
- Slide it parallel to the display down the left and right sides as shown in Fig 2.
- Pry at a 45 degrees angle on the bottom side to avoid insertion between the display and trim as shown in Fig 3.

⚠ Use caution

Avoid damaging the display spring and driver IC areas as shown in Fig 1.

Insert the ESD spudger **no further than 4 mm**.

💡 Disassembly sequence

1 (in the fixture; insert the ESD spudger to the top) → 2 (right) → 3 (left) → 4 (bottom)

To prevent the adhesive from sticking back, avoid removing the release liner.

Fig 1

Fig 2

Fig 3

Prop the display

- Use the **absorption-bulb** to hold the **display**.
- Avoid touching the **graphite**.

Use caution

Avoid stretching the **display flex** to prevent damage.

Be cautious not damage the **spring**, **FoF** and **graphite** during the process.

Be careful not to get cut by the **metal trim**.

Remove the cowling

- Gently push the **display cowling** to release the latch.
- Push it to the right with your **hand** to eject it.

Part: G730-09238-01 (display cowling)

Note

Be careful not to damage the **DJ flex** when you remove the **display cowling**.

Finished! Want assembly instructions? →

Disconnect the display

- Detach the **display connector** with the **ESD spudger**.
- Slowly peel off the **DJ flex PSA** manually by pulling DJ flex towards the display connector.
- Remove the **display module**.

Part: G949-01360-00 (display module)

Part: G806-14563-01 (DJ flex PSA)

Note

Use an ESD spudger to avoid damage to the components.

Disassembly instructions

BG sub

If you reuse the BG sub, ensure that any thermal paste or adhesive residue is completely removed.

Use caution

Review all **safety precautions** before you begin work.

Prerequisites

Before you begin a repair, make sure to **power off** the device and disconnect any charging cables.

✂ Required parts

Reuse indications

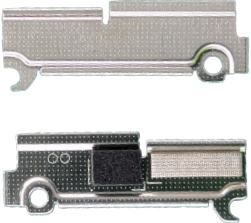

Reusable without cleaning

Reusable after cleaning

Not reusable after disassembly

BG sub

Here's the list of parts for the BG sub disassembly:

<div><div>BG sub</div><div>Multiple part numbers</div></div> <div></div>	<div><div>BG adhesive</div><div>G806-15981-01</div></div> <div></div>	<div><div>BG cowling</div><div>G730-09327-03</div></div> <div></div>	<div><div>Screw</div><div>G250-08169-03</div></div> <div></div>
--	---	---	--

Mark the opening pick

Measure **4 mm** and **2 mm** from the tip and mark the **opening pick**.

Use caution

Ensure proper marking to minimize damage.

A thicker opening pick might crack the back glass.

Depth: less than 4 mm
Thickness: less than 1 mm

Apply the small suction cup

Place a **small suction cup** close to the **USB side**.

Separate the BG

- Hold the device with one hand and pull up the **small suction cup** firmly with the other until a gap forms between the **BG** and the **enclosure**.
- Insert the **opening pick** and align it with the **4 mm** mark.

Note

If you can't create a gap, heat the **BG** side of the **enclosure** on a heat plate at **10°F (60°C)** for **10 minutes** and try again.

Separate the BG adhesive

Slide the **pick** clockwise through the edges.

Disassembly sequence

1 (insert opening pick to bottom)
→ 2 (left) → 3 (top) → 4 (right)

Use caution

Ensure that opening pick is inserted no further than **2 mm** in area A.

Remove the BG cowling

- Use the **absorption-bulb** to hold the **BG**.
- Remove **two BG cowling screws** with a **torx plus 3IP screwdriver**.
- Remove the **BG cowling** with **ESD tweezers**.

Part: G250-08169-03*2 (screw)

Part: G730-09327-03 (BG cowling)

Use caution

Be careful when you use the screwdriver.

Don't damage the adjacent battery.

Incorrect use of the screwdriver could cause injury to you or others and damage the battery or the product.

Note

Be careful not to stretch the **BG flex** to prevent damage.

Don't reuse the screws.

[Finished! Want assembly instructions? →](#)

Remove the BG sub

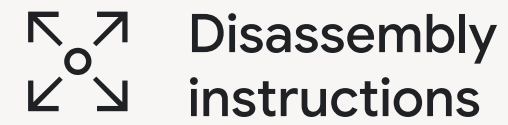

- Detach the **BG sub** and **battery connectors** from the **logic board** with an **ESD spudger**.
- Remove the **BG sub**.

Part: multiple part numbers (BG sub)

Note

Use the ESD spudger to avoid damage to the components.

Disassembly
instructions

Front camera

The front camera isn't fastened to the enclosure, it's simply connected to the logic board.

Use caution

Review all **safety precautions** before you begin work.

Prerequisites

Here's the list of components that you should remove first:

- **BG sub**

Tools

Torx plus 3IP screwdriver
ESD spudger
ESD tweezers
IPA and cloth

 Required parts

Reuse indications

Reusable without cleaning

Reusable after cleaning

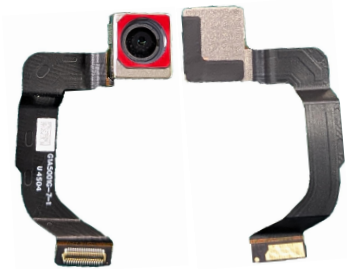

Not reusable after disassembly

Front camera

Here's the list of parts for the front camera disassembly:

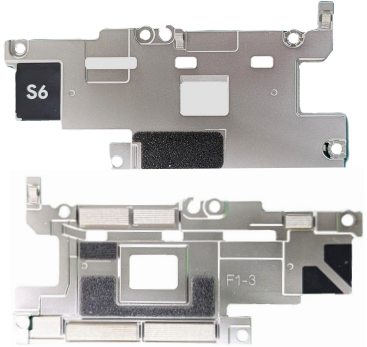

Front camera
G949-01379-00

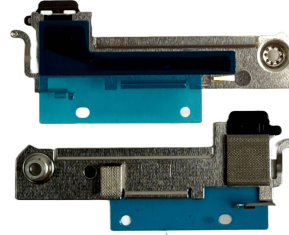

FCAM CP

FCAM cowling_Sub6
G730-09322-11

Screw
G250-08246-05

Screw
G250-07891-04

Remove the MLB cowling

- Remove the **four MLB cowling screws** with a **torx plus 3IP screwdriver**.
- Remove the **MLB cowling** with **ESD tweezers**.

Part: G250-08246-05*4 (screw)

Part: G730-09325-14 (MLB cowling)

Use caution

Be careful when you use the screwdriver.

Don't damage the adjacent battery.

Incorrect use of the screwdriver could cause injury to you or others or damage to the battery or the product.

Note

Don't reuse the screws.

Remove the screw

Remove the **FCAM cowling screw** with a **torx plus 3IP screwdriver**.

Part: G250-07891-04 (screw)

Use caution

Be careful when you use the screwdriver.

Don't damage the adjacent battery.

Incorrect use of the screwdriver could cause injury to you or others and damage the battery or the product.

Note

Don't reuse the part.

Remove the FCAM cowling

- Hold an **ESD spudger** against the **hook**.
- Push the **FCAM cowling** upward to remove the **FCAM cowling**.

Part: G730-09322-01 (FCAM cowling-mmWave)

Part: G730-09322-11 (FCAM cowling-sub6)

Note

Don't reuse the part.

Finished! Want assembly instructions? →

Remove the front camera

- Detach the **FCAM connector** with an **ESD spudger**.
- Remove the **front camera** with an **ESD spudger**.

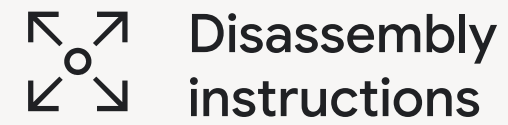

Part: G949-01379-00(front camera)

⚠ Use caution

Be cautious not to touch the **front camera lens**.

Don't grab the flex to remove the **front camera**.

Disassembly
instructions

mmWave module

Millimeter waves (mmWave) are the radio waves used to build a 5G network that provides fast and reliable mobile data with low latency for the latest devices.

Use caution

Review all **safety precautions** before you begin work.

Prerequisites

Here's the list of components that you should remove first:

- **BG sub**
- **Front camera**

Tools

Torx plus 3IP screwdriver
ESD spudger
ESD tweezers
IPA and cloth

✂ Required parts

mmWave module

Reuse indications

- Reusable without cleaning
- Reusable after cleaning
- Not reusable after disassembly

Part: G730-09426-02 (ANT4 cowling)

Use caution

Be careful when you use the screwdriver.

Don't damage the adjacent battery.

Incorrect use of the screwdriver could cause injury to you or others and damage the battery or the product.

Note

Don't reuse the screw.

Disconnect the SPAM

Detach the **SPAM connector** from the **ANT4 board** with the **ESD spudger**.

Note

Use the ESD spudger to avoid damage to the components.

Remove the coaxial cable

- Unbuckle the **coaxial cable** with an **ESD spudger**.
- Remove the **coaxial cable**.

Part: G821-01174-02 (coaxial cable)

Use caution

Be careful to avoid damage to components on the **logic board** and **ANT4 board**.

Note

Don't reuse the part.

Remove the screw

Remove the **ANT4 board screw** with the **torx plus 3IP screwdriver**.

Part: G250-07891-04 (screw)

Use caution

Be careful when you use the screwdriver.

Don't damage the adjacent battery.

Incorrect use of the screwdriver could cause injury to you or others and damage the battery or the product.

Note

Don't reuse the screw.

[Finished! Want assembly instructions? →](#)

Remove the ANT4 board

Insert the narrow end of an **ESD spudger** through the boss hole and press down to pivot and lift the **ANT4 board**.

Part: G949-01378-00 (ANT4 board)

Note

Use the ESD spudger to avoid damage to the components.

Don't wear gloves when you handle the **ANT4 board**.

Disassembly
instructions

Battery

Use caution

Use caution if you engage in repair.

When you open or repair the device, be careful of electric shock, device damage, fire and personal injury risks, and other hazards.

Before you service the product, read the full set of **precautions** in this document.

Battery handling

- Never bend, dent, puncture, or use tools to pry the battery.
- Store batteries in the replacement part packaging as soon as possible after removal to prevent damage.
- If a battery begins to vent, cover it in sand or use gloves and tongs to place the battery in a fire safe container as soon as possible.
- Take care to prevent shorting of battery terminals or battery damage, as it could cause fire or overheating.
- Dispose of the battery in accordance with local regulations.

Confirm before you proceed

- The battery is fully discharged and the device is disconnected from all power sources.
- Inspect the battery to see that the phone battery shows signs of swelling, damage. If the phone feels hot or emits a strong odor, *don't* attempt disassembly. Reach out to Google customer support.
- Take care not to expose the phone or its components to liquids after disassembly.

Disassembly
instructions

Battery

It's recommended to use the wrap to remove the battery.
If you use other methods, it might damage the device.

Use caution

Review all **safety precautions** before you begin work.

Prerequisites

Here's the list of components that you should remove first:

- **BG sub**

Tools

Universal base 12 mm

Universal holder

Universal holder limiting block

Universal supporting rubber

Universal press Plate 12 mm

Universal press fixture

Universal supporting rubber

Pixel 10 Pro XL battery press rubber

---	--	---	---	---

Use caution ⚠

Examples of unacceptable battery conditions that aren't suitable for repair.

Pouch damage

Line protrusion

Scratch

Contamination mark

Dot protrusion

Dent

Bubbling

Imprinted line

Swelling or electrolyte leakage

*These are examples of potentially dangerous battery conditions but *don't* reflect all possible dangerous conditions. Follow the general safety guidance outlined in this document.

Remove the CLB cowling

- Remove the **RF** and **five CLB cowlings screws** with the **torx plus 3IP screwdriver**.
- Remove the **CLB cowling** with **ESD tweezers**.

Part: G250-08246-05*5 (screw)

Part: G250-07839-03 (screw)

Part: G730-09320-01 (CLB cowling)

Use caution

Be careful when you use the screwdriver.

Don't damage the adjacent battery.

Incorrect use of the screwdriver could cause injury to you or others and damage the battery or the product.

Note

Don't reuse the screws.

A: G250-08246-05

B: G250-07839-03

Remove the RJ flex

- Detach the **RJ flex connectors** with an **ESD spudger**.
- Remove **RJ flex screw** with a **torx plus 3IP screwdriver**.
- Remove the **RJ flex**.

Part: G652-10612-01 (RJ flex)

Part: G250-07839-03 (screw)

Use caution

Be careful when you use the screwdriver.

Don't damage the adjacent battery.

Incorrect use of the screwdriver could cause injury to you or others and damage the battery or the product.

Note

Don't reuse the screw.

Remove the battery

- Wear the **ESD finger cots or gloves** to prevent slipping.
- If needed, use **ESD tweezers** to unstick the **green battery tab**.
- When you hold the device with your left hand, peel open the green battery tab with your right hand as shown in **Fig 1**.
- Make sure to carefully peel off the entire left wing of the battery wrap as shown in **Fig 2**.

Part: G949-01616-00 (battery)

Use caution

Avoid touching the **rear camera lenses, bottom speaker, volume button, and other components**.

Keep small screws and sharp objects away from the **battery**.

Fig 1

Fig 2

[Finished! Want assembly instructions? →](#)

Remove the battery

- Hold the device securely with your left hand, with the **left thumb located near the lower bottom speaker**. Grab the green battery tab with your right hand as shown in **Fig 1**.
- Slowly and firmly, pull the tab **perpendicular to the device to lift the left edge of the battery** as shown in **Fig 2**. Pull until you hear the adhesive break.
- Tear battery completely from the back side of the wrap as shown in **Fig 3**.
- While you hold the battery, slowly peel the battery wrap away from the enclosure as shown in **Fig 4**.
- Carefully remove and dispose of the **battery and battery wrap** safely.

Part: G949-01616-00 (battery)

Use caution

Avoid touching the **rear camera lenses, bottom speaker, volume button, and other components**.

Keep small screws and sharp objects away from the **battery**.

Note

Don't reuse the part.

Pull the left side of the wrap **perpendicularly** to the device to remove the battery.

Enclosure

Reuse the enclosure

- Inspect the **enclosure** for **adhesive** residue.
- If possible, carefully peel off the **adhesive** by hand in large sections.
- Use the **ESD spudger** to remove any remaining glue from the **enclosure**.
- Clean **thermal grease** and **mmWave TIM residue** from the **enclosure** with the **ESD spudger**.
- Where needed, use a **dust-free cloth** with **IPA** to clean the surface thoroughly.

Part: multiple part numbers (enclosure)

Note

Make sure that the side band protect film is removed when you use a new enclosure.

Assembly
instructions

Top speaker

Clean the enclosure

- Clean the **enclosure's adhesive** residue with **ESD tweezers**.
- Use a **dust-free cloth** with **IPA** to clean the affected surface.

Part: multiple part numbers (enclosure)

Attach the top speaker adhesive

Attach the **top speaker adhesive** to the top with **ESD tweezers**.

Part: G806-13668-01 (top speaker adhesive)

Use caution

Don't cover the speaker ports with the top speaker adhesive.

Attach the FoF

- Align from the **dashed line** on the enclosure Fig 1.
- Attach the **FoF** with **ESD tweezers** as shown in Fig 2 and Fig 3.

Parts: G806-11578-00 (FoF)

Note

This step is only present if the **FoF** is deformed or missing.

Otherwise, it could be reused.

Fig 1

Fig 2

Reuse the top speaker

- Clean the **top speaker's adhesive** residue with **ESD tweezers**.
- Use a **dust-free cloth** with **IPA** to clean the affected surface.

Part: G863-00688-01 (top speaker)

Attach the top speaker pad

Use **ESD tweezers** to align and adhere the **top speaker pad** to the embossed lines on the **top speaker**.

Part: G806-11577-00 (top speaker pad)

Note

Undamaged top speaker pad could be reused.

Damaged top speaker pad needs to be replaced.

Assemble the top speaker

- Gently tear off the **top speaker PSA liner**.
- Press for **6 seconds** manually to ensure adhesion.

Part: G863-00688-01 (top speaker)

Note

If the PSA is accidentally removed along with the liner, replace it.

Pad is between the top speaker and the enclosure.

Pad is under the top speaker.

Rear camera

Reuse the rear camera

- Clean the residue on the **rear camera** with **ESD tweezers**.
- Use a **dust-free cloth** with **IPA** to clean the surface where needed.

Part: G949-01380-00 (rear camera)

Use caution

Be careful to avoid touching the **rear camera lens**.

Check the logic board

General rules

Use caution

Before you attach the **rear camera** to the **logic board**, inspect the springs for any deformation.

During assembly, be **particularly cautious** to prevent any damage to the springs.

Springs

Pins

Deformation

Reuse the logic board

- Clean any **thermal grease** and **thermal TIM** residue from the **logic board** with an **ESD spudger**.
- Use a **dust-free cloth** with **IPA** to clean the surface where needed.
- Replace the **Thermal TIM**.

Part: multiple part numbers (logic board)

Use caution

Be careful to avoid damage to the components on the **logic board**.

Note

Don't wear gloves when you handle the **logic board**.

Undamaged **thermal TIM** could be reused.

Otherwise, they might need to be replaced.

Assemble the rear camera

Assemble the **rear camera** to the **logic board** at an angle to make sure that **flexes** go on both sides of the **logic board**.

Part: G949-01380-00 (rear camera)

Part: multiple part numbers (logic board)

Use caution

Be careful to avoid damage to the components on the **logic board**.

Note

Don't wear gloves when you handle the **logic board**.

Don't touch the **rear camera lenses**.

Buckle the rear camera

Buckle the **three rear camera connectors** to the **logic board**.

Part: G949-01380-00 (rear camera)

Part: multiple part numbers (logic board)

Note

Check if every connector is fully attached to the **logic board**.
Don't touch the rear camera lenses.

Springs

Deformation

Pins

Deformation

Attach the P-sensor foam

Attach the **P-sensor foam** to the **logic board** with **ESD tweezers**.

Part: G806-13064-01 (P-sensor foam)

Note

Skip this step if the **P-sensor foam** isn't removed or deformed during disassembly.

Use a new **foam** when you replace the **logic board**.

Wrong side

Missing

Apply the thermal TIM

Attach the **thermal TIM** to the designed position on the **logic board** with **ESD tweezers**.

Part: G864-01063-01 (thermal TIM)

Note

Skip this step if the **thermal TIM** is not removed or deformed during disassembly.

Use a new **TIM**, when you replace the **logic board**.

Apply the thermal grease

- Place the **Pixel 10 Pro XL thermal grease alignment fixture** on the enclosure, make sure it goes around the positioning post and boss hole as shown in Fig 1.
- Fill the cutout on the fixture with **thermal grease**.
- Distribute the grease evenly with an **opening pick**, move it in a single direction as shown in Fig 2.
- Lift the **fixture** straight up to avoid contamination as shown in Fig 3.

Part: G160-01459-00 (thermal grease)

Part: G160-01481-00 (thermal grease)

Use caution

Don't press the graphite.

Review safety precautions before you begin work.

Clean the **Pixel 10 Pro XL thermal grease alignment fixture** and **opening pick** after each use.

Avoid applying conductive thermal grease to nearby components.

Note

Use a cotton swab to clean up any excess thermal grease.

Assemble the logic board

Assemble the **logic board** to the **enclosure** from the top side at an angle.

Part: multiple part numbers (logic board)

Use caution

Be careful to avoid damage to the components on the **logic board**.

Note

Don't wear gloves when you handle the **logic board**.

Make sure that the logic board is properly installed by ensuring the positioning post goes through the boss hole.

Install the SIM tray

Insert the **SIM tray** into the slot.

Part: multiple part numbers (SIM tray)

Note

This step is only present for the **sub6 SKU**.

Fasten the screw

Fasten the **logic board screw** with a **torx plus 3IP screwdriver**.

Part: **G250-07839-04** (screw)

Use caution

Incorrect use of the screwdriver could cause injury to you or others and damage the product.

ANT4 board

Clean the enclosure

- Clean the **mic3 mesh** residue on the **enclosure** with **ESD tweezers**.
- Use a **dust-free cloth** with **IPA** to clean the surface where needed.

Part: multiple part numbers (enclosure)

Reuse the ANT4 board

- Clean the **mic3 mesh** residue on the **ANT4 board** with **ESD tweezers**.
- Use a **dust-free cloth** with **IPA** to clean the surface.

Part: G949-01378-00 (ANT4 board)

Use caution

Be careful to avoid damage to the components on the **ANT4 board**.

Note

Don't wear gloves when you handle the **ANT4 board**.

Replace the mic3 mesh

Attach the **mic3** mesh with ESD tweezers.

Part: G806-15772-01 (mic3 mesh)

Assemble the ANT4 board

Grab the **ANT4 board** securely along with the hook with **ESD tweezers** and attach it to the **enclosure**.

Part: G949-01378-00 (ANT4 board)

⚠ Use caution

Ensure that the **mic3 mesh liner** is removed before assembly.

Be careful to avoid damage to components on the **ANT4 board**.

💡 Note

*Don't wear gloves when you handle the **ANT4 board**.*

Secure the ANT4 board

Fasten the **ANT4 board screw** with a **torx plus 3IP screwdriver**.

Part: G250-07891-04 (screw)

Use caution

Incorrect use of the screwdriver could cause injury to you or others or damage to the product.

Buckle the coaxial cable

Buckle the **coaxial cable connectors** with an **ESD spudger**.

Part: G821-01174-02 (coaxial cable)

Note

Ensure that the connector is in the **right position**.

Check if the cable is fully attached to the **logic board** and the **ANT4 board**.

Reuse that SPAM flex

- Clean the adhesive residue on the **SPAM flex** with **ESD tweezers**.
- Use a **dust-free cloth** with **IPA** to clean the surface.
- Attach the **SPAM flex PSA** to the reused SPAM flex according to the outline.

Part: G949-01381-00 (SPAM flex)

Part: G806-16166-00 (SPAM flex PSA)

Assemble the SPAM flex

- Apply the **SPAM flex** around the leftmost **camera**.
- Buckle the **two SPAM flex connectors**.

Part: G949-01381-00 (SPAM flex)

Use caution

Remove the **SPAM flex adhesive liner** before assembly.

Avoid touching the **rear camera lenses**.

Note

Check if both **connectors** are fully attached to the **logic board** and the **ANT4 board**.

Assemble the ANT4 cowling

Assemble the **ANT4 cowling** with **ESD tweezers**.

Part: G730-09426-02 (ANT4 cowling)

Note

Install the **ANT4 cowling** into the **hook**.

Fasten the screw

Fasten the **ANT4 cowling screw** with the **torx plus 3IP screwdriver**.

Part: G250-07891-04 (screw)

Use caution

Incorrect use of the screwdriver could cause injury to you or others or damage to the product.

 Assembly
instructions

mmWave module

Reuse the mmWave module

- Clean the **mmWave TIM** residue with the **ESD spudger**.
- Use a **dust-free cloth** with **IPA** where needed.

Part: G949-01383-00 (mmWave module)

Note

This step is only present for the **mmWave SKU**.

Apply the thermal pad_mmWave

- Align the **thermal pad_mmWave** with **ESD tweezers** and press gently with your hand.
- Carefully remove the **liner**.

Part: G864-01053-01 (thermal pad_mmWave)

Note

Undamaged **mmWave TIM** could be reused.

Otherwise, they might need to be replaced.

This step is only present for the **mmWave SKU**.

Assemble the mmWave module or coaxial cable cowling

Assemble the **mmWave module** or the **coaxial cable cowling**.

Part: G949-01383-00 (mmWave module)

Part: G850-00697-01 (coaxial cable cowling)

mmWave SKU

Sub6 SKU

Connect the mmWave module

Buckle the **mmWave module connector**.

Part: G949-01383-00 (mmWave module)

Note

Check that the **connector** is fully attached to the **logic board**.

This step is only present for the **mmWave SKU**.

Fasten the screws

Fasten the **mmWave module** or **coaxial cable cowling screws** with a **torx plus 3IP screwdriver**.

Part: G250-07839-04 (screw)

Part: G250-07891-04 (screw)

Use caution

Incorrect use of the screwdriver could cause injury to you or others or damage to the product.

mmWave SKU

A: G250-07839-04

B: G250-07891-04

Sub6 SKU

A: G250-07839-04*2

Front camera

Clean the enclosure

- Clean the adhesive residue on the **enclosure** with **ESD tweezers**.
- Use a **dust-free cloth** with **IPA** to clean the surface.

Part: multiple part numbers (enclosure)

Note

Undamaged **FCAM adhesive** could be reused.

Otherwise, it might need to be replaced.

Reuse the front camera

- Clean the adhesive residue on the **front camera** with **ESD tweezers**.
- Use a **dust-free cloth** with **IPA** to clean the surface.

Part: G949-01379-00 (front camera)

Use caution

Be careful to avoid touching the **front camera lens**.

Attach the FCAM adhesive

- Attach the **FCAM adhesive** to the **enclosure** with **ESD tweezers**.
- Apply a gentle pressure to ensure proper attachment.

Part: G806-14192-01 (FCAM adhesive)

Insert the front camera

- Tear off the **liner** and assemble the **front camera** to the **enclosure**.
- Apply gentle pressure on the **camera** area to ensure proper attachment.
- Connect the **front camera** to the **logic board**.

Part: G949-01379-00 (front camera)

Use caution

Be careful to avoid touching the **front camera lens**.

Note

Check if the **connector** is fully attached to the **logic board**.

Assemble the FCAM cowling

- Gently push and route the **coaxial cable** under **top speaker** and **front camera module** bottom side.
- Assemble the **FCAM cowling** to the **enclosure** at an angle to the top.

Part: G730-09322-01 (FCAM cowling_mmWave)

Part: G730-09322-11 (FCAM cowling_Sub6)

Note

Make sure that the **FCAM cowling** goes into the enclosure slot.

Fasten the screw

Secure the **FCAM cowling screw** with a **torx plus 3IP screwdriver**.

Part: G250-07891-04 (screw)

Use caution

Incorrect use of the screwdriver could cause injury to you or others and damage the product.

Assembly
instructions

Display

Reuse the enclosure

- Inspect the **enclosure** for any adhesive residue.
- Carefully and slowly peel off the adhesive by hand in one piece.
- Use an **ESD spudger** to clean it. If needed, use a **dust-free cloth** with **IPA** to clean the surface.

Part: multiple part numbers (enclosure)

Apply the primer on enclosure

- Apply **IPA** around the edges of the **enclosure** with a **dust-free cotton swab**.
- Apply **3M 111 primer** around the edges of the **enclosure** with a **dust-free cotton swab**.

Part: multiple part numbers (enclosure)

Use caution

After the **primer** is applied, complete assembly within 25 minutes.

Align the adhesive

- Slowly remove the larger liner from the **adhesive sheet** to expose the adhesive.
- Place the **adhesive** according to the outline of the **enclosure**.

Part: G806-15948-01 (display adhesive)

Use caution

*Don't touch the **adhesive**.*

If it gets dirty, replace it with a new one.

During assembly, handle the springs with care to avoid causing damage.

Note

Make sure that the **adhesive** fits properly onto the **enclosure**.

Activate the adhesive (first time)

Gently press around the edges of the **enclosure** with the **ESD spudger** to strengthen the bond between the **enclosure** and the **adhesive**.

Remove the liner (first layer)

Carefully pull the tab to remove the **liner's** first layer. Avoid lifting the **adhesive**.

Use caution

Don't remove the second layer of the liner.

Activate the adhesive (second time)

Gently press around the edges of the **enclosure** with the **ESD spudger** to strengthen the bond between the **enclosure** and the **adhesive**.

Check the display

General rules

Use caution

Before you assemble, inspect the **display** for any spring deformation.

During assembly, handle the springs with care to avoid damage.

Spring

Prepare the display

- If you use a new **display**, remove the **shim** at the bottom, **label**, **P-sensor** and **FCAM** liners.
- Inspect the reused **display** for any adhesive residue.
- Carefully and slowly peel off the adhesive with your hand in one piece.
- Use the **ESD spudger** to clean it. If needed, use a **dust-free cloth** with **IPA** to clean the surface.

Part: G949-01360-00 (display module)

Apply the primer on display

- Apply **IPA** around the edges of the **display module** with a **dust-free cotton swab**.
- Apply **3M 111 primer** around the edges of the **display module** with a **dust-free cotton swab**.

Part: G949-01360-00 (display module)

Use caution

When you apply IPA and AP111 primer to the display module, avoid touching the copper and the sponge areas.

After the primer is applied, complete assembly in 25 minutes.

Reuse the DJ flex

- Clean any **DJ shear PSA** residue from the **DJ flex** with an **ESD spudger**.
- Use a **dust-free cloth** with **IPA** to clean the surface where needed.

Part: G652-10410-04 (DJ flex)

Connect the DJ flex

- Apply the **DJ flex PSA** to the **DJ flex** and position it to the lower right corner of the slanted indent on the **flex**.
- Connect the **DJ flex** to the **display module**.

Part: G652-10410-04 (DJ flex)

Part: G806-14563-01 (DJ flex PSA)

Use caution

Don't remove the liner yet.

Avoid scratching the flex against the **graphite**.

Pressure should be applied straight downward on the connector, not against any part of the flex.

Note

Avoid damage to the springs.

Be mindful of the orientation of the flex.

Insert the display cowling

- Gently push the **display cowling** inside the left hook to snap it into place.
- Remove the **DJ flex PSA liner** and gently press on the adhesive area to ensure attachment.

Part: G730-09238-01 (display cowling)

Use caution

Avoid scratching the flex against the **graphite**.

Remove the liner (second layer)

Carefully pull the tab to remove the **liner's** second layer. Avoid lifting the **adhesive**.

Position the DJ flex

Insert the loose end of the **DJ flex** into the opening on the **enclosure**.

Use caution

Don't touch the adhesive.

Avoid scratching the flex against the **graphite**.

Make sure that the flex **doesn't** go through the lower opening to avoid graphite breakage.

Activate the adhesive

- Attach the **display module** to the **enclosure** by aligning and lowering it vertically.
- Press along the **display bezel** with both hands to ensure proper attachment.

Use caution

Begin by pressing the center of the top edge, then continue along the two longer sides, and finish with the bottom edge.

Connect the display

Connect the **DJ flex** to the **logic board**, applying even pressure across the connector.

Assembly
instructions

Vibrator

Prepare for vibrator attachment

- Remove any **adhesive** residue in the vibrator slot with the **ESD spudger**.
- Use a **dust-free cloth** with **IPA** to clean the surface where needed.

Part: multiple part numbers (enclosure)

Reuse the vibrator

- Clean the residue on the **vibrator** with **ESD tweezers**.
- Use a **dust-free cloth** with **IPA** to clean the surface where needed.
- Replace the **vibrator PSA**.

Part: G710-07500-00 (vibrator)

Part: G806-13155-00 (vibrator PSA)

Attach the vibrator

- Remove the **vibrator PSA liner**.
- Slot the **vibrator** into place according to the upper right corner.
- Press for **5 seconds** manually.

Part: G710-07500-00 (vibrator)

Bottom speaker

Apply the dry lube

- Remove the **metal mesh liner** on the **enclosure**.
- Apply dry lube to the **bottom speaker** port.

Embed the bottom speaker

Slot the **bottom speaker** into the **enclosure** at an angle.

Part: G863-00655-01 (bottom speaker)

Note

Make sure that the **bottom speaker** goes under the enclosure rim.

Assembly
instructions

Chin board

Check the chin board

General rules

Use caution

Before you assemble the **chin board**, check for springs and pins deformation.

Be **particularly cautious** to prevent any damage to the springs.

Bird view

OK

No

Missing

Side view

OK

No

Broken

Prepare the chin board

- When you use a new **enclosure**, remove the **mic1 bracket liner**.
- When you replace the **chin board**, remove the **mic1 Kapton** from the new **chin board**.

Part: multiple part numbers (enclosure)

Part: G949-01377-00 (chin board)

Use caution

Be careful to avoid damage to the components on the **chin board**.

Make sure that **all liners** are removed before assembly.

Note

*Don't wear gloves when you handle the **chin board**.*

Install the chin board

- Install the **chin board** downward at a slight angle to make sure that the USB port goes inside the slot on the **enclosure**.
- Fix the **chin board screw** with a **torx plus 3IP screwdriver**.

Part: G250-07839-04 (screw)

Part: G949-01377-00 (chin board)

Use caution

Incorrect use of the screwdriver could cause injury to you or others, or cause damage to the product.

Note

*Don't wear gloves when you handle the **chin board**.*

Push gently to ensure that the **chin board** goes under the retaining wall and that the lower two springs touch the metal sheets on the **enclosure**.

Reuse the CJ flex

- Clean the residue on the **CJ flex** with **ESD tweezers**.
- Use a **dust-free cloth** with **IPA** to clean the surface where needed.
- Replace the **CJ flex PSA** to the very top of the curve.

Part: G949-01382-00 (CJ flex)

Part: G806-14188-01 (CJ flex PSA)

Connect the chin board

- Remove the **CJ flex PSA liner** and gently press on the adhesive area to ensure attachment.
- Connect the **chin board** to the **logic board** with the **CJ flex**.

Note

Ensure that **CJ flex connectors** are fully attached to both the **logic board** and the **chin board**.

Battery

Clean the residue

- Remove any adhesive residue in the **battery** area with the **ESD spudger**.
- Apply **IPA** with a **dust-free cloth** where needed.

Part: multiple part numbers (enclosure)

Apply the primer on enclosure

- Before installation, remove any debris or loose screws from the **enclosure**.
- Apply **IPA** on the **enclosure** with a **dust-free cotton swab**.
- Apply **3M 111 primer** onto the **enclosure** with a **dust-free cotton swab**.

Part: multiple part numbers (enclosure)

Use caution

After the primer is applied, complete assembly within 25 minutes.

Align the battery

- Confirm the **battery** model to be **G6X1Z**. If the model number is not **G6X1Z**, *don't* use the battery.
- Use a **absorption-bulb** to pick up the **battery**.
- Align the **white liner** to the lower left corner of the depression.
- Gently press the **battery** down with the **suction bulb**.
- Remove the **white liner** from the **top side** to lift it up after assembling the battery.

Part: G949-01616-00 (battery)

Use caution

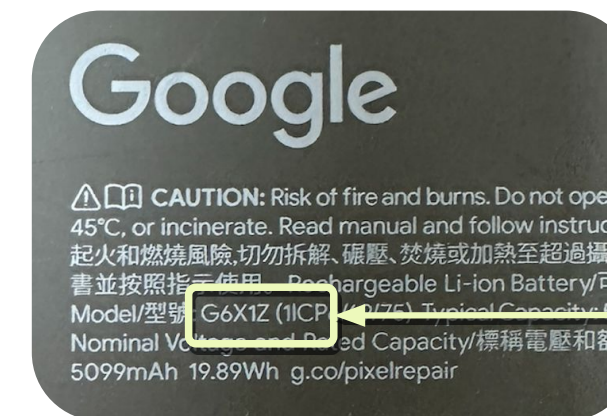

Review safety precautions before work.

Note

The **white liner** makes sure the **battery** is in the correct position.

Don't remove it prior installation.

Prepare to press

- Place the **universal holder** in the **C5 position** on the **universal base 12 mm**.
- Place the **universal supporting rubber** and the **universal holder limiting block** through the positioning posts on the **universal holder** in this order, as shown in Fig 1.
- Place the **device** and **lock** it as shown in Fig 2.
- Place the **Pixel 10 Pro XL battery press rubber** through the positioning posts as shown in Fig 3.

Note

Make sure that the **universal holder** is in the right position.

Ensure that the **display** is already assembled.

Fig 1

Fig 2

Fig 3

Prepare to press

- Place the **universal press plate 12 mm** on the **universal base 12 mm**.
- Place the stack in the **universal press fixture**.
- Press the handle down for **30 seconds**.
- Restore the handle to the original position and remove the stack.

Use caution

Keep hands clear during operation.

Attach the RJ flex

Connect the **chin board** to the **logic board** with the **RJ flex**.

Part: G652-10612-01 (RJ flex)

Note

Ensure that the **RJ flex connectors** are fully attached to both the **logic board** and the **chin board**.

Secure the CLB cowling

- Place the **CLB cowling** in position with **ESD tweezers**, making sure the screw holes align with those of the components below.
- Fasten the **five CLB cowling screws** and **two RJ flex screws** in a sequence with a **torx plus 3IP screwdriver**.

Part: G730-09320-01 (CLB cowling)

Part: G250-08246-05*5 (screw)

Part: G250-07839-03*2 (screw)

Use caution

Be careful to avoid damage to the components on the **chin board**.

Be careful when you use the screwdriver.

Don't damage the adjacent battery.

Incorrect use of the screwdriver could cause injury to you or others and damage the battery or the product.

A: G250-08246-05

B: G250-07839-03

BG sub

Place the MLB cowling

- Place the **MLB cowling** in position with **ESD tweezers**, making sure the screw holes align with those of the components below.
- Fasten the **4 MLB cowling screws** in a sequence with a **torx plus 3IP screwdriver**.

Part: G730-09325-14 (MLB cowling)

Part: G250-08246-05*4 (screw)

Use caution

Be careful when you use the screwdriver.

Don't damage the adjacent battery.

Incorrect use of the screwdriver could cause injury to you or others and damage to the battery or the product.

Apply the primer on enclosure

- Apply **IPA** around the edges of the **enclosure** with a **dust-free cotton swab**.
- Apply **3M 111 primer** around the edges of the **enclosure** with a **dust-free cotton swab**.

Part: multiple part numbers (enclosure)

Use caution

After the **primer** is applied, complete assembly within 25 minutes.

Connect the battery

- Buckle the **battery connector**.
- Power on to check if the device works properly, power off the device after you check it.

Note

Ensure that the **battery connector** is fully attached to the **logic board**.

Align the adhesive

- Slowly remove the larger liner from the **adhesive sheet** to expose the adhesive.
- Place the **adhesive** according to the outline of the **enclosure**.

Part: G806-15981-01 (BG adhesive)

Use caution

*Don't touch the **adhesive**.*

If it gets dirty, replace it with a new one.

During assembly, handle the springs with care to avoid damage.

Note

Make sure that the **adhesive** fits properly onto the **enclosure**.

Activate the adhesive (first time)

Gently press around the edges of the **enclosure** with an **ESD spudger** to strengthen the bond between the **enclosure** and the **adhesive**.

Use caution

Don't touch the RCAM area during the process.

Remove the liner (first layer)

Carefully pull the tab to remove the **liner's** first layer. Avoid lifting the **adhesive**.

Use caution

*Don't touch the **RCAM** area during the process.*

Don't remove the second layer of the liner.

Pick the tab here.

Activate the adhesive (second time)

Gently press around the edges of the **enclosure** with the **ESD spudger** to strengthen the bond between the **enclosure** and the **adhesive**.

Use caution

Don't touch the RCAM area during the process.

Prepare the BG sub

- When you use a new **BG sub**, remove the **RCAM protective films**.
- Inspect the reused **BG sub** for any adhesive residue.
- Carefully and slowly peel off the adhesive by hand in one piece.
- Use the **ESD spudger** to clean it. Use a **dust-free cloth** with **IPA** to clean the surface if needed.

Part: multiple part numbers (BG sub)

Use caution

Be careful to avoid touching the **rear camera lens**.

Reused BG sub

New BG sub

Apply the primer on BG sub

- Apply **IPA** around the edges of the **BG sub** with a **dust-free cotton swab**.
- Apply **3M 111 primer** around the edges of the **BG sub** with a **dust-free cotton swab**.

Part: multiple part numbers (BG sub)

Use caution

After the **primer** is applied, complete assembly within 25 minutes.

Connect the BG sub

- Use the **absorption-bulb** to prop up the **BG sub**.
- Connect the **BG flex** to the **logic board**, applying even pressure across the connector.

Use caution

Pressure should be applied straight downward on the connector, not against any other part of the flex.

Insert the BG cowling

Install the **BG cowling** upward at an angle so the tongue goes inside the groove.

Part: G730-09327-03 (BG cowling)

Use caution

Avoid damage to the BG sub flex.

Tighten the screws

Fasten **two BG cowling screws** with a **torx plus 3IP screwdriver**.

Part: G250-08169-03*2 (screw)

Use caution

Be careful when you use the screwdriver.

Don't damage the adjacent battery.

Incorrect use of the screwdriver could cause injury to you or others and damage the battery or the product.

Remove the liner (second layer)

Carefully pull the tab to remove the **liner's** second layer. Avoid lifting the **adhesive**.

Use caution

Avoid damage to the **BG sub flex**.

*Don't touch the **RCAM** area during the process.*

Attach the BG sub

- Align and lower the **BG sub** to the **enclosure**.
- Press along the **BG bezels** with both hands to ensure proper attachment.

Note

To begin, press the center of the top edge, then continue along the two longer sides, and finish with the bottom edge.

Don't press directly on the visor area in this process.

Prepare to press

- Place the **Pixel universal holder** in the **B1 position** on the **Pixel universal base**.
- Place the **Pixel universal supporting rubber** and the **Pixel universal holder limiting block** through the positioning posts on the **Pixel universal holder** in this order, as shown in Fig 1.
- Place the **device** and **lock** it as shown in Fig 2.
- Place the **Pixel 10 Pro XL BG press rubber** through the positioning posts as shown in Fig 3.

Note

Make sure that the Pixel universal holder is in the right position.

Fig 1

Fig 2

Fig 3

Prepare to press

- Place the **universal press plate 12 mm** on the **universal base**.
- Place the stack in the **Pixel universal press fixture**.
- Press the handle down for **45 seconds**.
- Restore the handle to the original position and remove the stack.

Use caution

Keep hands clear during operation.
