

Tez for Business

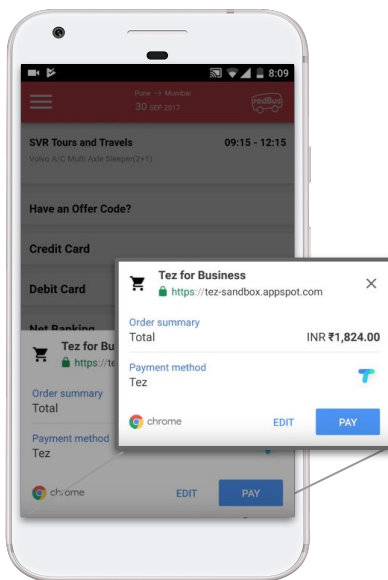

Overview

Tez is a mobile commerce and payments app from Google, made for India first. We let you transact directly from your bank account via UPI, so that money stays in your account, earning interest.

Today, small merchants (eg. local Kirana shop) that earn less than 50K INR per month can use Tez for UPI transactions. This would be the same user journey as when two users transact on Tez.

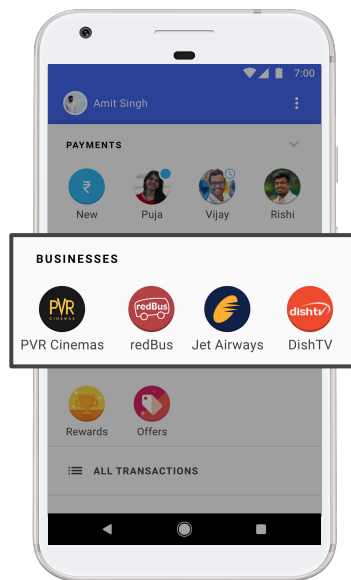

For businesses that would like a more tailored Tez experience with deeper integrations, we've launched the **Tez for Business** partner program, that has three key benefits with more features on the way (eg. credit and credit cards,, bill pay, mobile recharge):

Seamless and Secure Mobile Payments

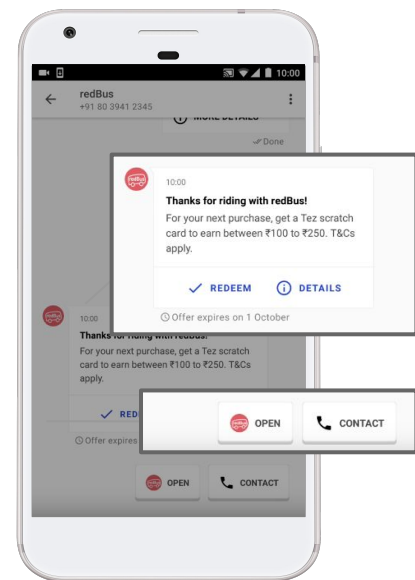

Effortless and reliable checkout with UPI supported bank accounts

Business Channels

Users connect directly with Business Channels, from the homescreen, with auto bill reminders and payment capability

Offers and Actions

Send offers directly to customers through Business Channels, and personalize CTAs that can lead to external links

How to Get Started?

Please complete the required [express your interest form](#) today.
