ABOUT TRUST ID

TrustID comes in 4 editions: Classic, Premium, Pro and Pro-Smart. All editions support local license activation as well as subscription-based module. With an easy-to-use wizard for card creation and database setup, you can get started in just a few clicks.

TrustID for Magicard printer, based on our powerful CardExchange® Producer product, is one of the most successful ID card design and production softwares on the market. We have four different editions that take you from an entry level solution to our enterprise edition that gives you unparalleled features.

With features such as connecting your card to unlimited databases to sophisticated contactless encoding applications, we have it all. Need to look up records with biometric data? We have it. Need to control what every user can see and do? We have it.

FEATURES AT A GLANCE

➤➤➤ **Endless Database Capabilities**

Connect card templates to any database, including existing ones or our sample databases. After printing, update records, print dates, smart card data, photos, etc., across multiple back offices with one click. Supports popular SQL databases and ODBC natively. API connections available through purchased plug-ins.

»»» **Card Encoding**

The PRO-SMART Edition includes inline encoding for popular technologies like MIFARE®, DESfire, and magnetic strip, plus PROX read-only capability. TrustID features an intuitive setup wizard and powerful database connections, allowing you to store encoded data across multiple back offices with a single click.

»»» **Advanced Designer**

Create professional ID cards effortlessly with customizable fonts, images, graphics, barcodes, and magnetic strips. Utilize advanced graphic tools for object manipulation, background removal, and graphic enhancements. Templates feature multiple layouts with automatic switching based on field values. Customize text appearance, merge fields, and set images as text backgrounds. Enjoy an intuitive, Microsoft®-style user interface for easy navigation.

»»» **User and Group Profiles**

Our Premium Edition allows for the creation of user and group profiles with a login feature, enabling control over access and activities within the application. This includes setting visibility and actions for groups or individual users, such as department-specific access, login expiration, password resets, and tailored access to templates, functions, and tools. This customization enhances data security and streamlines the user interface by removing irrelevant content.
