FEEL THE **POWER**

OF ENHANCED EFFICIENCY AND DURABILITY

Manufactured in a USA OEM Factory

2-Year Warranty!

ETL/C Certified! Including Canada.

Enhanced motor: Offers exceptional speed and efficiency with 3450RPM and 2.7CC per revolution pump, resulting in 2.5 gallons per minute (GPM).

Suction tube assembly: Secure and robust construction of the pickup tube and attachment helps prevent fluid pump cavitation and connection failures commonly associated with alternative brands.

Durable black & white 3.5 gallon tank:

- White, translucent section offers fluid level visibility
- Dip stick and breather cap for secondary fluid level verification
- Thicker wall with molded ribs for enhanced durability
- Resists tough environments inside or outside

Ball Knob Release Lever: Offers ease of operation.

Return tube: SVI units have a return tube that extends to the bottom of tank, allowing for a reduction in noise and fluid aeration.

OEM Factory Power Unit from SVI!
This power unit is designed and sold exclusively by SVI.
Made in the USA (with USA & Foreign Content).
