03 About SwipBox

THE SWIPBOX **INFINITY SOLUTION**

“It's all about the joy of anticipation – beginning with the checkout experience, building up with the notifications during the parcel journey and culminating when you actually access your parcel by pressing that button in the app ... ”

Christina, frequent online shopper
Nordic Survey 2020

An entire ecosystem

The SwipBox Infinity solution is much more than an innovative parcel locker with an award-winning hardware design – it's an entire ecosystem that:

- allows you to make sound data-driven decisions based on the comprehensive overview given by our network administration and business intelligence tools
- ensures easy integration into your own systems using our APIs and SDKs
- delivers a smooth app experience for your couriers,

end users and maintenance operators alike.

You get our award-winning hardware design, an intuitive user flow, a customised webtool, our app universe, a location management system and integration via our seamless API.

The SwipBox Infinity solution is used for dense networks worldwide. The parcel lockers are easy to relocate if necessary, and more can be added to increase capacity at any given location.

INFINITY ADD-ONS

Web apps and app clips

Want to offer an installation-free app option? Use our app clips and web apps to let your users pick up their parcels.

AI Location Generator

Win the location game. Speed up the location scouting process by using our AI Location Generator.

Apple Watch

Make picking up parcels even easier. Let your users pick up their parcels using just one hand by simply tapping their Apple Watch.

LED module

Create convenience at night. Use our patent-pending intelligent LED module, which activates upon app connection.

THE SWIPBOX INFINITY APP UNIVERSE

The End User App

allows the end user to pick up and send parcels through the parcel locker. The app also sends out notifications and provides an overview of the parcel history and navigation to the parcel lockers.

The Courier App

allows the courier to deliver and pick up parcels. The courier can also use the app to book a compartment in case of a failed home delivery and change compartment sizes.

The Maintenance App

allows the maintenance operator to install, service and uninstall parcel lockers. The comprehensive overview makes it easy to plan and complete maintenance tickets and checks.

The Warehouse App

lets you keep track of all SwipBox Infinity parcel lockers in stock, including in multi-warehouse setups.

Step 1
Online purchase checkout flow

Step 3
Courier transport

Step 5
Push notification

Step 2
Pickup at eComm and arrival at the hub

Step 4
The courier delivers to the parcel locker

Step 6
Customer pickup

Infinity solution is very
simple

Testimonials The SwipBox Infinity parcel lockers can be found all over the world under different brand names. You can read about some of them here.

skroutz last mile

Skroutz Last Mile is the dedicated courier arm of Skroutz, the leading e-commerce company in Greece. Focused on providing excellent delivery service, they started rolling out a nationwide Infinity parcel locker network in the spring of 2022.

"When expanding our parcel delivery network, we decided to go with the Infinity lockers because of their quick installation, low TCO and user friendliness. Everything from installation to delivery and pickup is extremely easy, and we are very pleased with this strategic decision, which has enabled us to deploy a network in record time."

Stefanos Katsimpas, Business Director at Skroutz Last Mile

Cargus In September 2022 one of the largest courier players in Romania, Cargus, rolled out almost three hundred parcel lockers. The move was a response to end-user needs and a deep understanding of the market trends.

"We needed to take a step forward and adapt to the market's new reality and demand, and it was clear to us that the SwipBox Infinity lockers could help us achieve an important milestone in our development strategy. The lockers complete our national out of home network and offer an innovative solution to ecommerce businesses, local and international, and their customers. We are glad to have a partner like SwipBox that can help us develop an easy, convenient, cost-efficient, contactless and sustainable delivery option."

Anda Bucşan, Chief Customer Officer at Cargus

Orian As an important part of Orian's strategy, the leading logistics partner in Israel installed the first Infinity parcel lockers in selected cities at the beginning of 2022. They are now in the process of making it a nationwide solution, providing convenience to customers all over Israel.

"Convenience and sustainability have always been top priorities for us and we believe the Infinity lockers deliver on both counts. They are designed for dense networks, enabling us to deliver parcels using electric vehicles – and when those dense networks are placed near our customers, they not only provide convenience, it also encourages customers to pick up their parcels without getting into a car. Both factors contribute to a reduction in CO2 emissions."

Asaf Dayan, eCommerce Services Manager at Orian DB Schenker

PostNord The leading postal operator in the Nordic region, PostNord, is operating SwipBox Infinity parcel locker networks in Denmark, Sweden, Norway and Finland - using multiple brand names.

"The patterns in online shopping have changed heavily, and the consumers demand convenient parcel delivery. Due to this we must be sure that we evolve with the expectations and have the best offers. A part of this strategy is the Infinity solution, which we are operating with in Denmark, Sweden, Norway and Finland. It's a great advantage to have an innovative partner like SwipBox that keeps evolving with us, so we are sure that we always offer the best solution to our customers"

Lars Bryldt Christensen, Nordic Strategic Infrastructure & Process Manager at PostNord

Pakkeboks

Posten Norge After a successful pilot SwipBox and Posten Norge are rolling out a nationwide parcel locker network. The network is being operated under the brand Pakkeboks from which anyone in Norway can pick up their parcels with the Pakkeboks app.

nærboks

pakker tæt på dig

Nærboks is a truly open network, through which PostNord, Bring and DHL deliver parcels. The Nærboks network was established in March 2019 in Denmark, starting with a pilot project of 200 SwipBox Infinity parcel lockers before being rolled out across the country.

Bpost Belgium's leading postal operator, Bpost, is operating a parcel locker network in Belgium with the SwipBox Infinity parcel lockers. The network was launched in August 2020.

"We are very happy to be trialling the SwipBox Infinity concept, as it's an obvious supplement to our green logistics strategy, which aims to offer sustainable and convenient last and first mile solutions. Thus we are looking forward to the collaboration and a greener last mile future."

Nick Bond, Head of Partner Network at Bpost

THE SWIPBOX CIRCUIT SOLUTION

SwipBox Circuit Intelligent label that enables reusable alternative to single-use packaging.

Step 1
Online shoppers choose reusable packaging during checkout

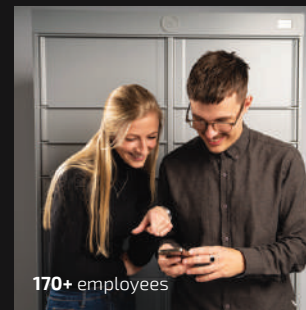

Step 2
Upon receipt, they remove their products from the packaging

Step 3
... and leave the packaging behind so it can be used again - and again and again

About SwipBox® Founder of SwipBox, Allan Kaczmarek, first got the idea of taking a different approach to the last mile challenge back in 2003. The production and development started in his father's garage with one predominant ideology in mind – customer convenience. SwipBox was founded in 2012 and within two weeks, the first 400 parcel lockers had been rolled out in Denmark. We now have thousands of parcel lockers all over the world.

170+ employees

Two types of parcel lockers: **SwipBox Infinity** and **SwipBox Classic**
