

# SWIPBOX® INFINITY

## TECHNICAL SPECIFICATION

# ONE PLATFORM. INFINITE POSSIBILITIES.

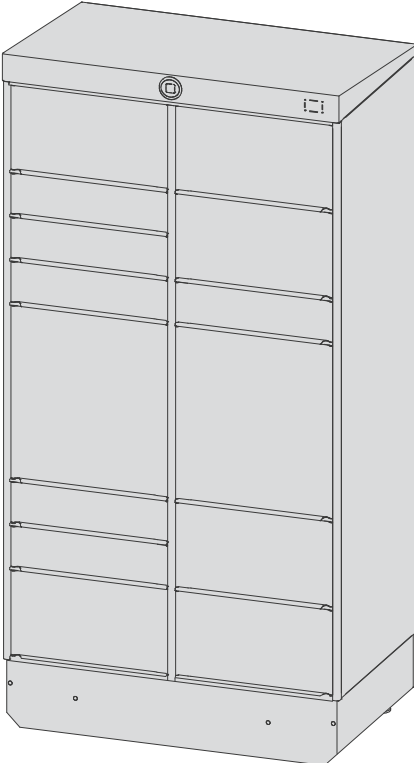

**SwipBox Infinity**, SwipBox's flagship lean locker, communicates via Bluetooth, runs on a battery and is fully app operated from configuration to installation and parcel pickup. This lean version is ideal for markets that are digitally mature and carriers who are looking for a locker solution with minimum maintenance.

**SwipBox Infinity Flex and SwipBox Infinity Connect** build on the Infinity platform's lean-locker foundation. Both models are battery-powered and Bluetooth-enabled and may be fully app-operated.

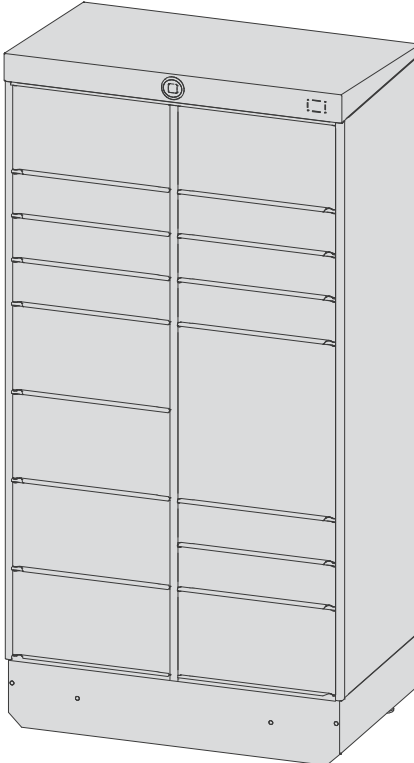

Infinity Flex combines app control with a built-in PIN pad or screen interface, while Infinity Connect pairs app control with a standalone screen module for PIN code entry. This flexibility allows you to match each installation to user preferences and location needs without deploying multiple locker systems.

**Match your customers' needs.** Today's customers expect fast delivery and flexible pickup options. Infinity offers multiple interface choices – app, PIN pad or screen – so you can select the solution that fits your users.

**Adapt your network with ease.** From small parcels to mixed sizes, Infinity models fit your operation. Fast installation means you can scale, relocate or respond quickly to changing customer needs.

**Keep costs low with a lean design.** Infinity's ultra-low energy consumption means that over 10 years, it uses the equivalent of a hairdryer running for just 7 minutes. A minimal mechanical design reduces maintenance needs, repair costs, and part replacements, helping you lower both operational expenses and environmental impact.
