

# Synvestable

**We are Synvestable** — your trusted partner in cloud computing and technology services dedicated to serving the United States government. At Synvestable, we are committed to simplifying lives through technology enablement, offering tailored solutions that empower your agency to thrive.

## Core Competencies

### Cloud Professional Services

Leverage our expertise in cloud technologies to design, deploy, optimize, and manage cloud-based solutions tailored to your specific requirements.

### Process Automation

Free up valuable human resources and cloud deployments by automating tasks and fulfillment processes using RPA, API's, and CI/CD pipelines.

### Machine Learning & Forecasting

Harness the power of AI to deliver personalized experiences and forecast future trends with accuracy—from data strategy and lakehousing to feature engineering pipelines and generative model development.

### Payment & Billing Integrations

Expand your payment options and integrate billing processes seamlessly across your ecosystem—or utilize Synvestable as a centralized service provider (CSP).

### Dashboard Analytics

Access real-time data on key metrics, empowering you with comprehensive insights into operations, budgets, milestones, and cybersecurity.

### Risk Analytics

Mitigate business risks through advanced risk modeling, enabling proactive decision-making and strategic planning.

## Differentiators

Synvestable

### ✓ Passion for Finance & Technology

Our team is driven by a deep-rooted enthusiasm for finance and technology, propelling us to deliver innovative solutions.

### ✓ Commitment to Continuous Improvement

We thrive on the pursuit of excellence, constantly seeking ways to enhance our capabilities and exceed client expectations.

### ✓ Fulfillment Through Client Success

Nothing brings us greater satisfaction than witnessing the positive impact of our solutions on our clients' operations.

### ✓ Striving for Excellence

We are relentless in our pursuit of excellence, dedicated to being the premier provider of cloud computing and technology services.

## Past Performance

### Hybrid Cloud Automation & Modernization (DoE)

For the U.S. Department of Energy, we were tasked with creating FedRAMP Moderate compliant cloud environments across Google Cloud Platform and AWS using Terraform and Cloud Formation.

### FedRAMP Compliant Automated VPC Creation (DoE)

Our strategists not only wrote the deliverable code for creating new cloud environments, but also provided documentation for NIST 800-53, NIST 800-171, and NIST CSF security controls to key agency stakeholders.

### Machine Learning For Personally Identifiable Information (PII) (The White House)

We worked with key departments within the White House for providing machine learning models for detecting personally identifiable information (PII) within uploaded documents on Whitehouse.gov—removing detected PII and replacing it with anonymized text.

## Proven Track Record of Performance
