Single-Use, Multi-Sensor Tracker

The Tive Solo 5G™ is an innovative, inexpensive supply chain tracker that measures temperature, humidity, shock, and light exposure. Using the latest advancements in cellular technology, it reports the sensor data along with location in real-time to our cloud-based software platform. From there you can monitor shipments, analyze your data, configure geofences, and view customizable sensor alerts so you always know what's going on. It only takes a single button hold to turn it on , and there's no need to return the tracker, eliminating complex reverse logistics operations.

Achieve real-time in-transit visibility
