TIN: 37433913936

Technical Data Sheet

Product Name: Barite Powder Drilling Grade API 13A

PRODUCT DESCRIPTION

CHARACTERISTICS USES

Barite Powder is high quality drilling grade barite (barium sulfate) weighing material used to increase density of drilling fluids, it is most widely used drilling weight material due to its high specific gravity, it meet API13A requirement it does not react with other drilling fluids or hanger the in functioning it is chemical inert and insoluble.

PHYSICAL PROPERTIES OF RAW MATERIAL

Specific Gravity	4.20 g/cm3
Residue Greater Than 75 μm (%)	3.00% max
Particles Less Than 6 μm Equivalent Spherical Diameter (%)	25% max
Water Soluble Alkaline Earth Metal As Ca (mg Ca/kg)	72 mg/kg

CHEMICAL ANALYSIS OF THE RAW MATERIAL

BaSO4	90%	min
Cd (ppm)	0.7	max
Hg (ppm)	0.05	max
As (ppm)	0.1	max
Pb	0.087 %	max

TIN: 37433913936

Technical Data Sheet

Product Name: Barite Powder Drilling Grade API13A

TECHNICAL DATA OF THE PRODUCED MATERIAL

Moisture 0

0.5 % max

Odor

Odorless

PACKING

50 Kg. PP bag

1,500 kg. Jumbo bag
