Flutter Working Student (m/f/d)

About us

As a startup dedicated to public transport, our vision is to make buying tickets for passengers as easy as possible. Therefore, we are developing a ticketing system that automatically detects beginning and end of a journey. Based on the detection, it is possible to provide the passenger with the cheapest ticket.

The problems we are trying to solve are both interesting and challenging: developing a reliable ride detection algorithm based on data from smartphone sensors while creating a solution that attracts both passengers and public transport providers.

We value active collaboration and independent work. We believe that together we can build a great solution that will have a major impact on public transport.

Responsibilities

- Work with our team on our Flutter mobile application
- Develop a beautiful and simple to use mobile app
- Design and develop automated tests to ensure that the app runs perfectly
- Contribute your own ideas to the app and shape how users interact with our solution

Your profile

- Expertise with Flutter (Dart)
- Experience in mobile development (swift and android)
- Studying computer science, engineering or similar
- Interest to learn more programming languages as needed

Bonus skills

- Experience with AWS
- Experience with test deployment (CI/CD)
- Knowledge in Go
- Advanced skills with vue.js

Benefits

🕐 Flexible working hours	Up-to-date tech stack	Couch & plants in the office
Freedom to contribute and implement your own ideas	Competitive pay	Free fruits & snacks
Challenging and exciting tasks	Flat hierarchies
