VINIFICATION

a small amount of juice is bled off the carignan component of our indica red wine, and is fermented in stainless steel using wild yeast. malolactic fermentation occurred naturally and finished completely. the wine remained in neutral oak on its fine lees for 5-months before bottling.

SITE

from a mid-century planting of dry-farmed, head-pruned carignan located in mendocino, a severe diurnal shift supports gradual (and often late) ripening. the soil is red clay strewn with fist sized rocks. the combination of vine age, an extended growing season, and tougher soil conspires to produce complex, intense wines.
